

GUIDE 2025
PRODUCTS AND SYSTEMS
APPLIED

2025

This document is dedicated to those looking for specialized advanced heating, air conditioning, air renewal and air purification solutions.

Solutions able to increase the comfort level in the places where we live, work and spend our free time.

Complete year round systems, focused on substantial energy savings and less dependency on the fossil fuels used by traditional HVAC solutions, such as natural gas or oil.

INSPIRING SOLUTIONS

This Guide is printed every year and presents all Clivet's products with the aim of providing a basis for decisions and evaluations.

More detailed information, updated regularly, is available in the "SYSTEMS AND PRODUCTS" area at www.clivet.com and on Clivet Apps, where they can be downloaded free of charge.

To keep up to date with Clivet news, follow us on our social networks:

CLIVET

Over 35 years of expertise in heat pumps.

Clivet has been leading the way in heat pump innovation since 1989. We were among the first to recognise the technology's potential for efficient and sustainable comfort – and our dedication to innovation hasn't wavered since.

Purpose-built solutions.

Clivet engineer its solutions from the ground up to offer specialised systems designed for a diverse range of applications and environments. Boasting the widest range of heat-pump solutions, our flexible, adaptable approach ensures a perfect fit for your specific requirements.

Crafted in Europe.

As a European company from the start, we understand the unique needs and demands of this market. Our heat pump solutions are designed with your comfort in mind, considering everything from climate variations to specific building requirements.

A simplified product experience

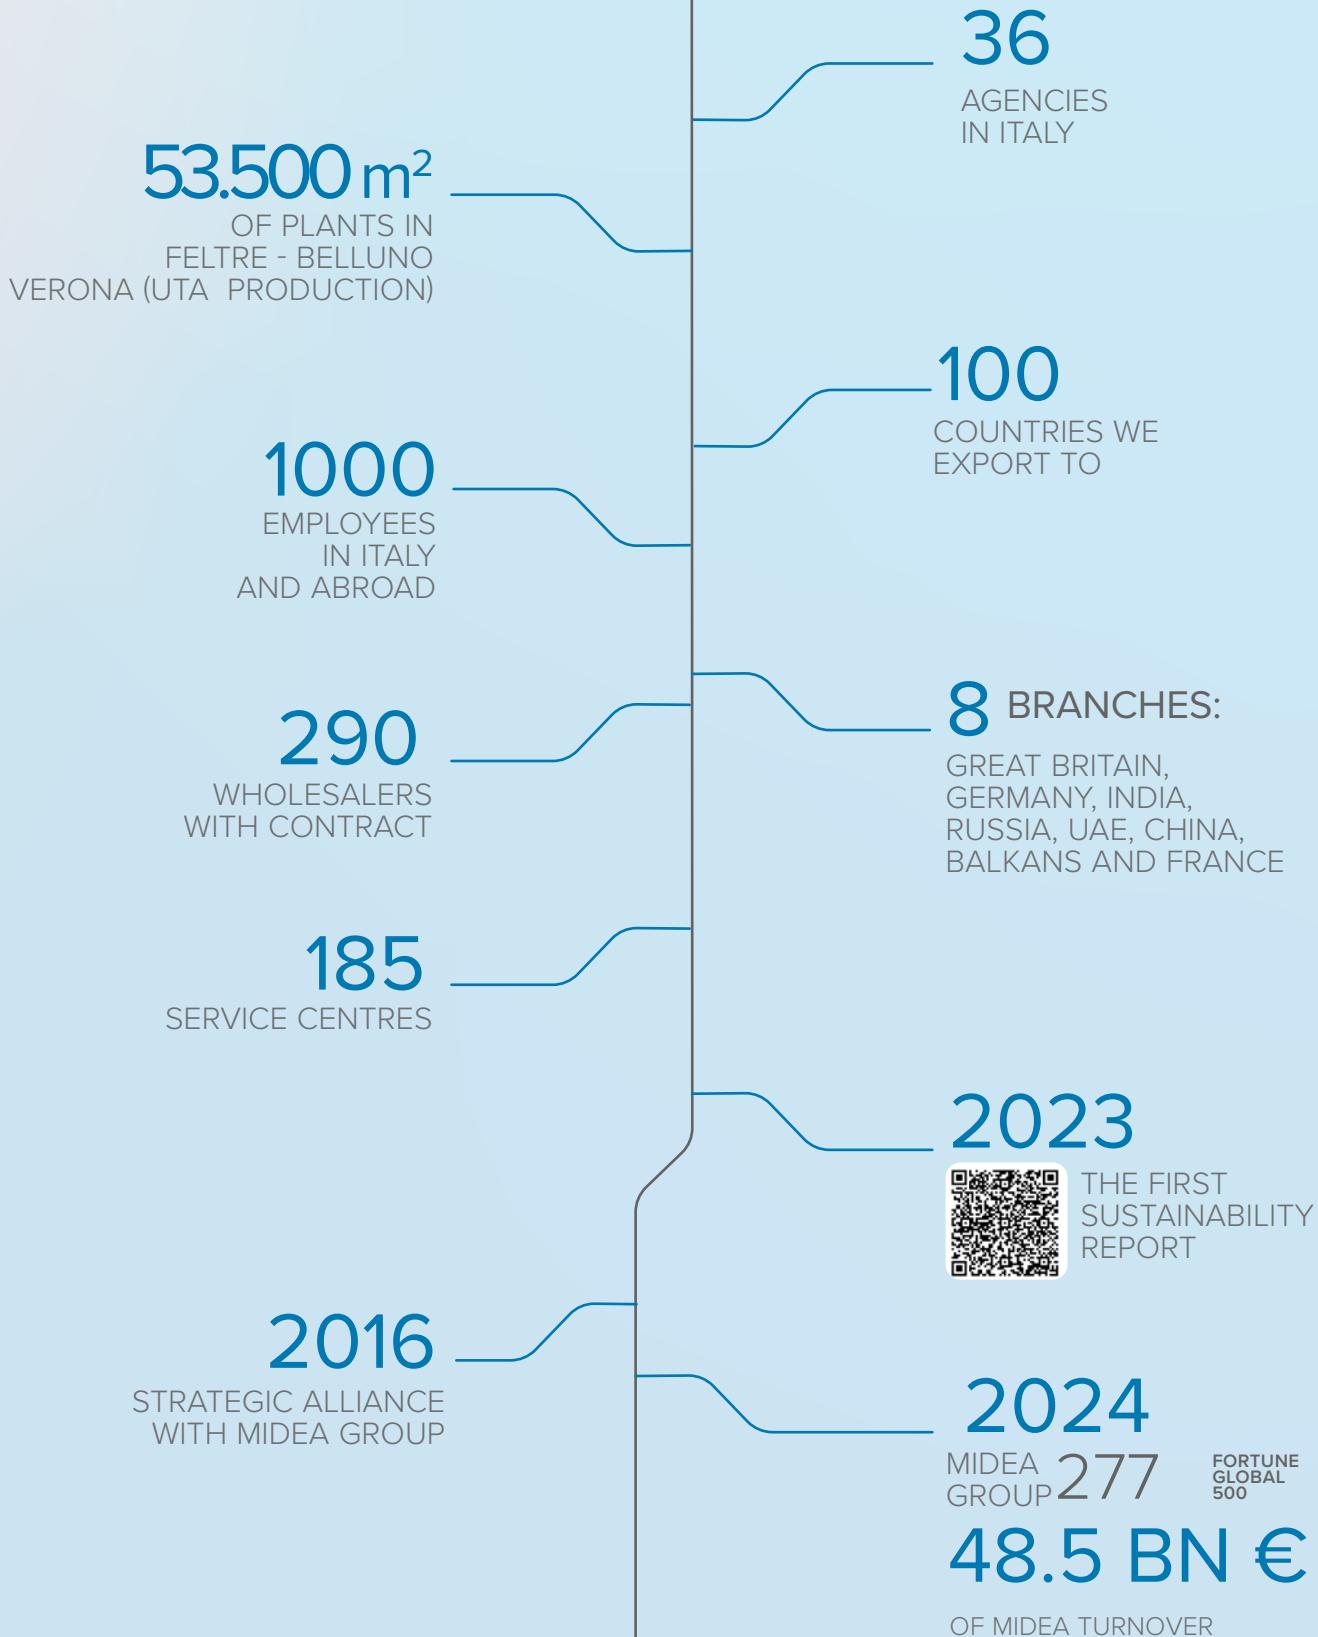

Clivet systems streamline every step, from simplified design and installation to effortless operation and control. Engineered for efficiency from the ground up, Clivet delivers unparalleled ease of use, lower operating costs, and a lasting commitment to sustainability.

SPECIALISED SYSTEMS
for any application
and climate condition

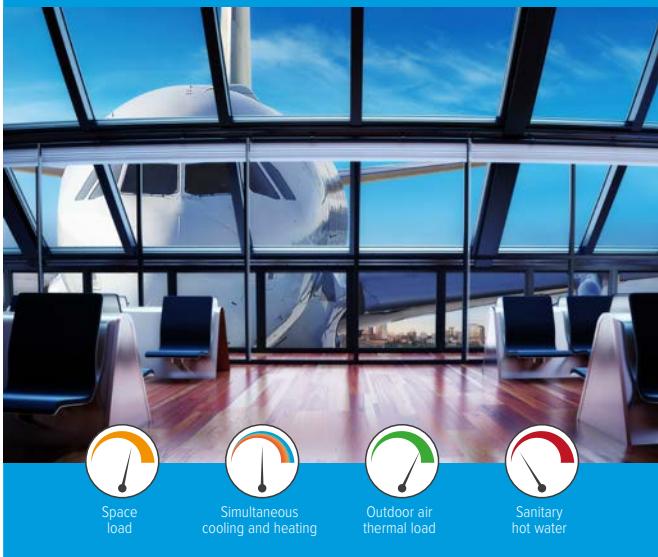

Today, buildings have to deliver an elevated and constant standard of well-being, regardless of the outside conditions.

Not all buildings are alike: depending on their use, there are considerable differences in terms of load intensity, simultaneous requests for hot and chilled water, domestic hot water production and air renewal.

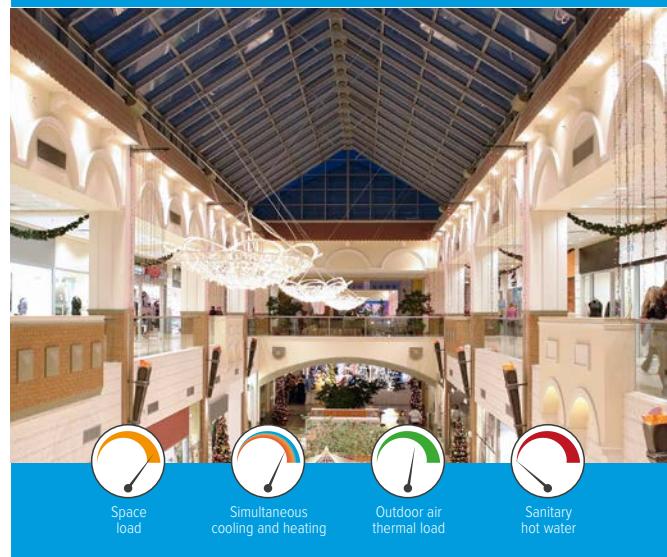

That is why Clivet has created a series of specialised system solutions for applications that meet the specific needs of different buildings by optimising the overall efficiency in relation to traditional systems (boiler, chiller, AHU).

Clivet's specialised systems simplify the design and installation work, improve the control of the entire system, reduce the environmental impact and, at the same time, optimise the initial investment, reduce running costs, increasing the building's energy rating and therefore its value on the market.

Industry

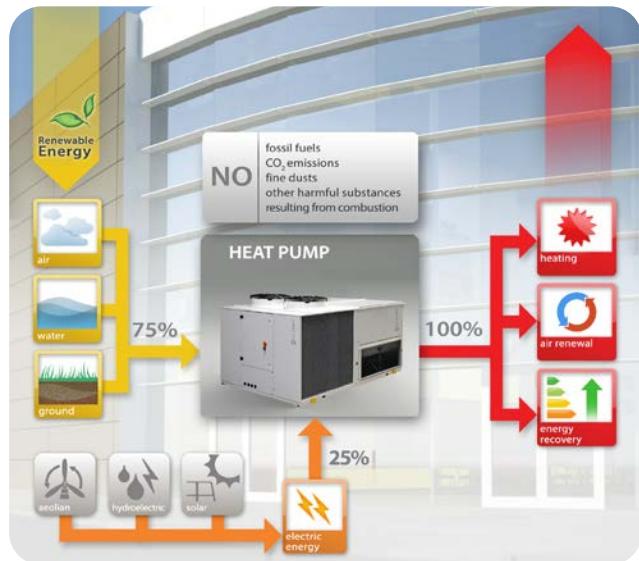

CLIVET PRINCIPLES for the building evaluation

All Clivet systems are based on six key principles that make Clivet's products and systems unique.

These principles are the basis for making application-specific systems, which have always been part of Clivet's DNA.

They represent the foundation on which Clivet has built its new way of looking at systems, thereby becoming the reference for sustainable systems of the future.

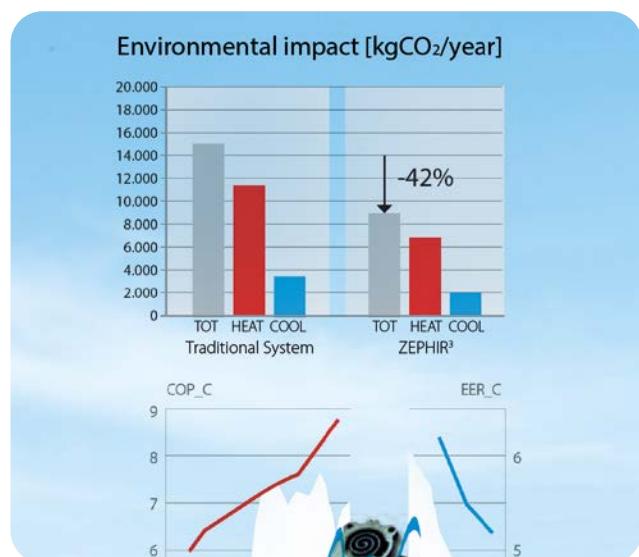

Heat pump technology

Importance of air renewal

High Seasonal efficiency

ZEPHIR³, Office Building in London, case study

Heat pumps are the technology of the future since they are significantly more efficient than traditional combustion systems:

- ✓ **Reductions of 50% in Primary Energy, CO₂ and Running Costs**
- ✓ **Extensive use of Renewable Energy**

Thanks to heat pumps, Clivet's systems guarantee:

- ✓ A single system for both heating and cooling
- ✓ Controlled mechanical ventilation with innovative thermodynamic recovery
- ✓ Free production of domestic hot water in summer
- ✓ Simultaneous heating and cooling to fulfil simultaneous loads

The quality of air inside modern airtight buildings is undermined by a number of pollutants.

The controlled mechanical ventilation system is essential to creating a more liveable environment.

Clivet's stand-alone system with thermodynamic energy recovery dedicated to ventilation has the following benefits:

- ✓ It recovers energy both in winter and in summer
- ✓ Reduces the load of outdoor air with a more efficient system and provides more energy for the rooms
- ✓ Reduces the capacity of the main generators by limiting their operation to seasonal peaks
- ✓ Dehumidifies in summer

Seasonal efficiency ensures the best way of understanding how energy is used when choosing the system to ensure year-round comfort.

Every application has different needs which vary depending on multiple factors, including different indoor and outdoor climatic conditions, crowding and thermal loads.

Clivet makes systems designed to meet the specific needs of every single application, thereby optimising the use of the system's resources to reach top seasonal efficiency levels thanks to:

- ✓ One systemic solution
- ✓ Use of the most favourable resources
- ✓ Full control over the system
- ✓ Continuous capacity modulation

Multifunction

Decentralization

Integrated systems

Clivet's multifunction systems include all the functions to ensure year-round comfort. They optimise the solution based on the needs of the various applications and integrate it in specialised products and in complete dedicated systems:

- ✓ Heating
- ✓ Cooling
- ✓ Domestic hot water
- ✓ Air renewal and purification
- ✓ Dehumidification

In developing Clivet products and systems one aspect that was given great attention was how to rationalise the choices in terms of design and construction, which could affect the system's running costs and environmental impact for its entire life cycle.

Many years ago, Clivet successfully developed the principle of generating energy as close as possible to where it needs to be used:

- ✓ Modular systems that are active only where and when required
- ✓ Reduction or complete elimination of auxiliary consumption (for instance, pumping energy)
- ✓ Stand-alone system
- ✓ Easy to maintain and handle
- ✓ Adapts to the needs of the system

Clivet designs its systems by integrating all the services required for each application.

The system's elements, optimised and industrially processed to work together, guarantee the highest efficiency and reliability.

- ✓ Simplified design and installation
- ✓ Lower investment costs
- ✓ Quality of the systems
- ✓ Guaranteed performance

In residential, commercial and industrial buildings, the air conditioning system is the main source of energy consumption, accounting for almost half of the building's total consumption. There is an increasing need for an energy transition as the effect of climate change is growing.

Clivet has decided to play a key role by designing and promoting new technological solutions to improve the efficiency of buildings and significantly reduce its carbon footprint for increasingly sustainable installations.

The optimisation system for the commercial and industrial sector

Optimising the operation of HVAC systems allows the efficiency of the plants to be maximised in the various working conditions, guaranteeing the reduction of energy consumption and ensuring continuity of operation in the production and distribution of thermo-cooling energy.

Clivet's **INTELLIPLANT** solution manages all the elements of medium and large hydronic systems, guaranteeing the best operating conditions for the lowest possible energy consumption.

Developed entirely by Clivet specialists, Intelliplant makes it possible to achieve the maximum efficiency of the system and the units it interfaces with, thanks to algorithms derived from Clivet know-how that make better use of the machine control logics than the most common generalist solutions on the market.

The control system for the residential sector

A comfortable living environment is important to ensure your health and wellbeing.

Control4 NRG coordinates all the components of your system, optimising the performance and operation of the units and generating the right amount of energy only where and when needed... to ensure that everyone is happy.

Control4 NRG is designed to integrate with the most advanced technologies used for the production of renewable energy, acquiring the energy produced by the photovoltaic system and the energy used by the air conditioning system and organising the display of energy profiles and self-consumption levels.

Control4 NRG ensures Class A operation according to the most stringent requirements concerning the energy rating of buildings.

The cloud-based remote monitoring and management system for all Clivet systems

Clivet Eye is the Cloud-based monitoring system for remote management from smartphones, tablets and PCs of air conditioning, heating, air renewal and domestic hot water production units and systems.

The Clivet Eye interface allows you to access your system remotely. It combines the immediacy and ease of use of an app with advanced "data analytics" functions that can be used with a PC and are typical of a control environment designed for professional use.

Clivet Eye's map allows you to identify where Systems are and access them in real time, easily and intuitively highlighting the related operating conditions.

Event notifications promptly warn of any System malfunctions.

CLIVET COMBINES THE BEST TECHNOLOGY with an excellent product quality and performance certification system

The innovation for which Clivet has always stood out, is supported by an industrial framework that has adopted the standards envisaged by ISO 9001, since 1996, guaranteeing a quality management system designed to control company processes so that they are targeted at improving the efficacy and efficiency of the organisation, as well as at client satisfaction.

In 2021 the Innovation Centre, Clivet's new centre for technological innovation, was officially opened with two new test rooms where Clivet can carry out functional, performance, acoustic, vibration and stress tests, with air temperatures from -20°C to +60°C, for units up to 2.5 MW with new refrigerants with a low environmental impact. Customers can attend the tests both at the Innovation Centre and online.

Clivet uses latest generation sheet metal folding, press and cutting machines for the mechanical production of its components. High product quality standards are also guaranteed by the use of patented electronic controls.

Clivet only uses non-toxic and low environmental impact alloys for soldering, insulation and gases that comply with the strictest European standards, and the best components available on the market.

Certifications and safety

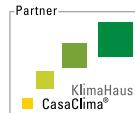

They optimise the solution based on the needs of the **various applications** and integrate it in specialised products and in complete dedicated systems:

Clivet is committed in promoting the green building principles and has become a member of GBC Italia. This organization collaborates with **GBC Italia**, the U.S. nonprofit organization that promotes worldwide the **LEED®** system of independent certification.

With the aim of providing Customer satisfaction, Clivet S.p.A. has supplemented and certified its Quality, Environment and Safety Management Systems, in accordance with the ISO 9001, ISO 14001 and ISO 45001 International Standards.

In 2015, Clivet became a partner of **CasaClima**, as a result, Clivet is now part of a network of companies renowned for their technical expertise and constant focus on sustainable home management.

Where applicable.

<https://www.agenziacasaclima.it/en>

KEYMARK is a mark recognized in many European countries for the provision of incentives for the installation of heat pumps for room heating and the production of domestic hot water.

The countries that recognize the mark and the Certified Products are available on www.heatpumpkeymark.com
Where applicable.

Clivet participates in the EUROVENT "Liquid Chilling Packages and Hydronic Heat Pumps", "Rooftops", "Air Handling Units", "Fan Coil Units" and "VRF" Certification programmes. The products concerned feature in the EUROVENT guide to certified products and on the website www.eurovent-certification.com. The programmes cover up to the limits set by the purpose of each programme.
Where applicable.

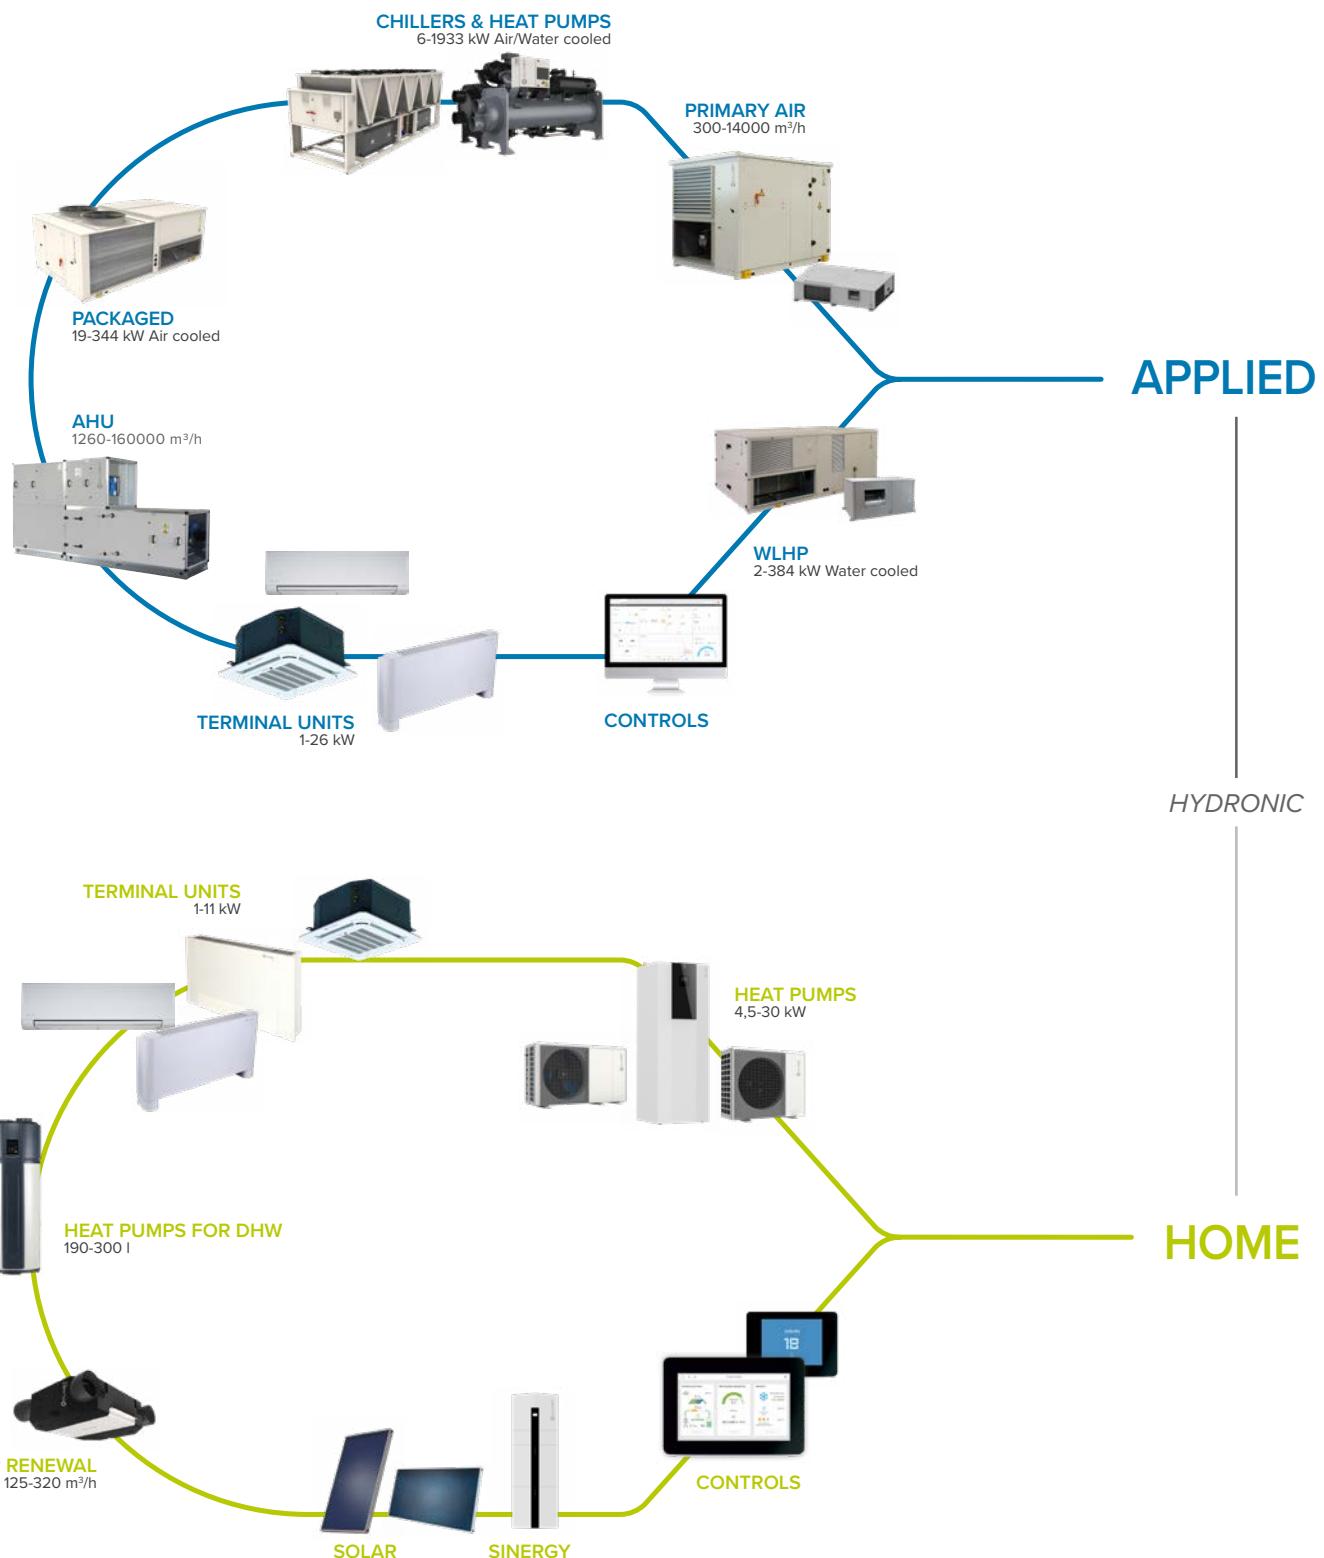

The wide range of Clivet products and complete systems comply with the requirements of the implementing measures for ErP (Energy related Products) Directives 2009/125/EC (Eco-design) and 2010/30/EU (Energy labelling), whose purpose is to reduce the energy consumption of products for heating, cooling, ventilation and hot water production, encouraging the user towards energy-efficient choices. Directives 2009/125/EC and 2010/30/EU include the following Regulations: (EU) 206/2012, (EU) 626/2011; (EU) 811/2013, (EU) 812/2013, (EU) 813/2013, (EU) 814/2013; (EU) 1253/2014, (EU) 1254/2014; (EU) 2016/2281.

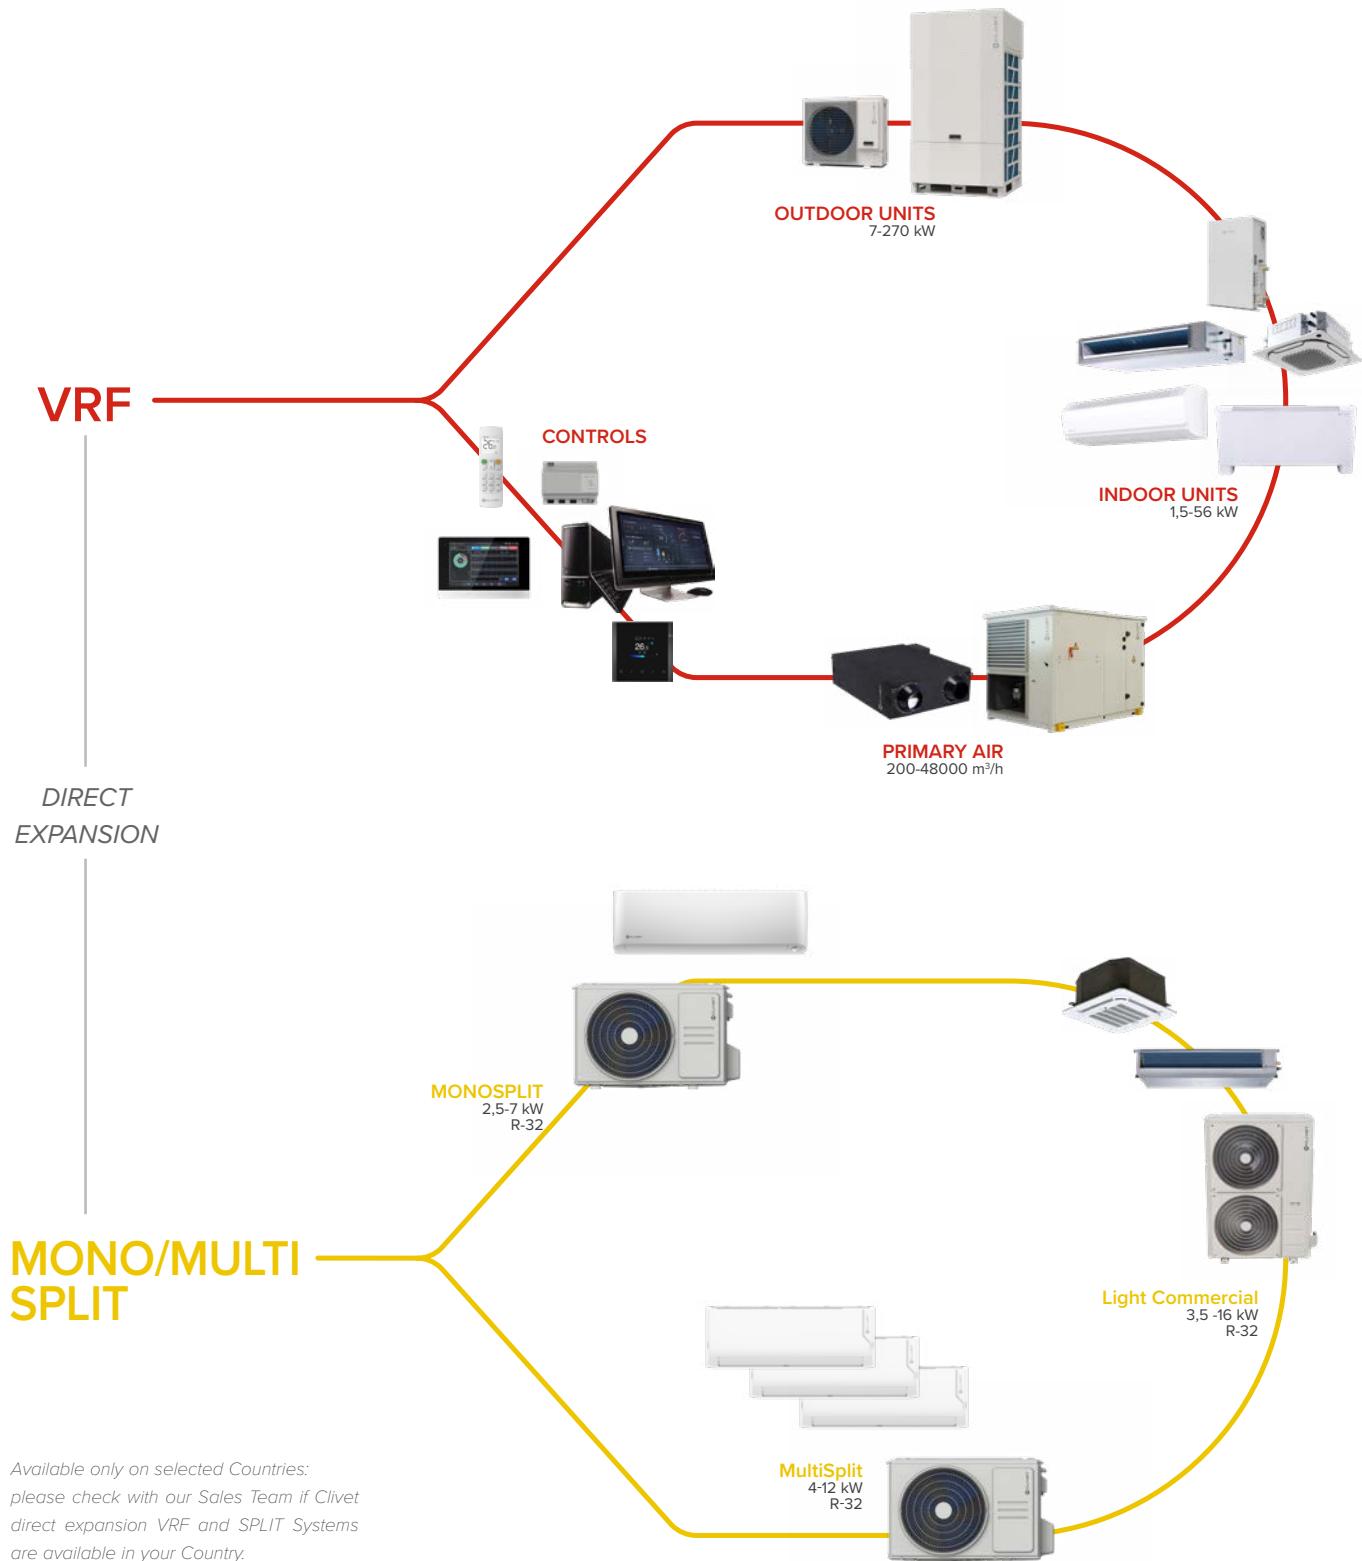

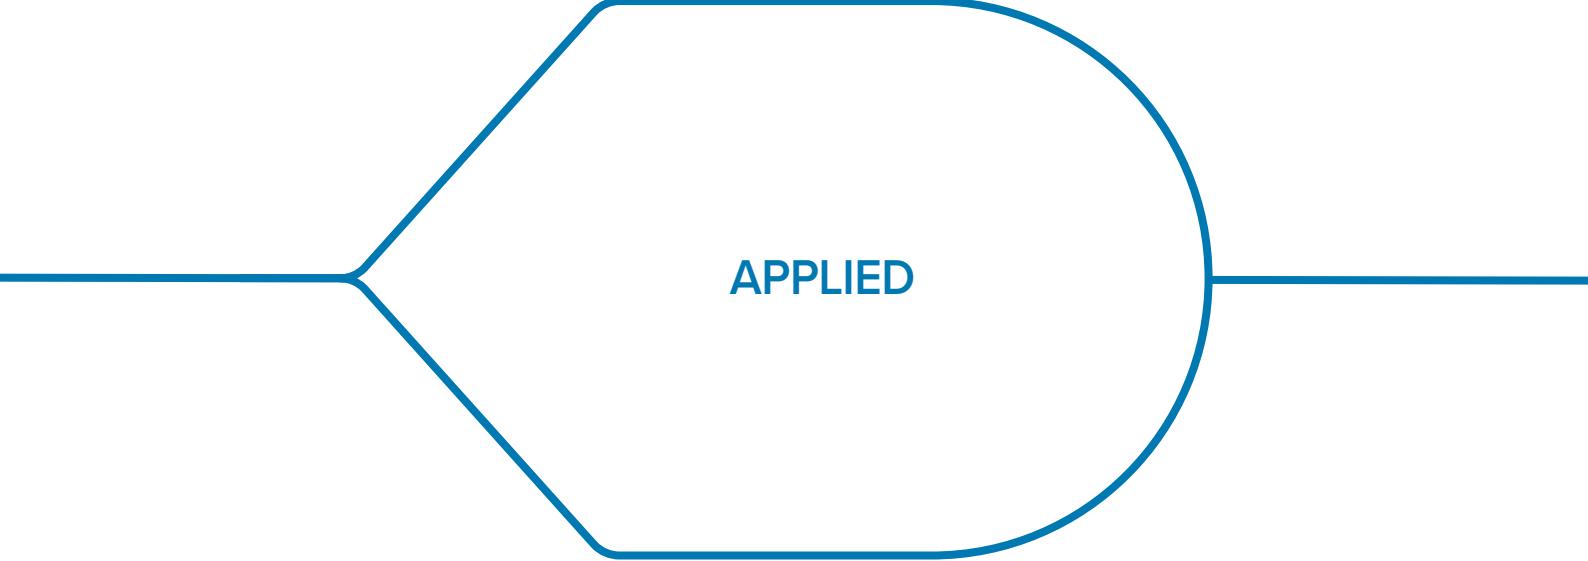

Clivet is involved in the BEYOND GREEN project to promote sustainability and the circular economy together with the other members of SAFE, the consortium system for the circular economy which works to raise public awareness regarding environmental issues, management and valorisation waste, education and training on environmental protection, research on environmental protection.

(1) Data calculated in compliance with Standard EN 14511:2022 referred to the following conditions:

Internal exchanger water temperature = 12/7°C; Outdoor heat exchanger inlet air temperature = 35°C

(2) Data calculated in compliance with Standard EN 14511:2022 referred to the following conditions:
Internal exchanger water temperature = 40/45°C; Outdoor heat exchanger inlet air temperature 7 D.B. / 6 °C W.B.

(3) Sound pressure levels are referred to units operating at nominal load in nominal conditions.
Measurements are carried out accordingly to UNI EN ISO 9614-1 at nominal standard conditions defined in respective regulations: EU 2016/2281, UE 813/2013, UE 811/2013.

(4) Data calculated according to the EN 14825:2018 Regulation

The Product is compliant with the ErP (Energy Related Products) European Directive. It includes the Commission delegated Regulation (EU) No 811/2013 (rated heat output ≤70 kW at specified reference conditions), the Commission delegated Regulation (EU) No 813/2013 (rated heat output ≤400 kW at specified reference conditions).

accessories

HYG1	Hydronic assembly with 1 ON/OFF pump	CMSC13	Serial communication module for Modbus TCP/IP, BACnet IP, BACnet MSTP supervisor
HYGU1VI	Hydronic unit on user side with an integrated inverter pump	VACS	DHW switching valve
ACC	Storage tank	VACSX	Switching valve for DHW production
IFWX	Steel mesh strainer on the water side	HYGU1V	Hydronic unit on user side with one inverter pump (sizes 43.2 to 55.2)
IFWI	Steel mesh strainer on the water side include in the packaging	HYGU2	Hydronic unit on user side with 2 on-off pumps (sizes 43.2 to 55.2)
REMAU	Additional board for advanced function management	HYGU2V	Hydronic unit on user side with 2 inverter pumps (sizes 43.2 to 55.2)
PGFC	Finned coil protection grill	AVIBX	Anti-vibration mount support
PGFCX	Finned coil protection grill	AMMSX	Anti-seismic spring antivibration mounts
CCCA	Copper / aluminium condenser coil with acrylic lining	AVIBI	Anti-vibration mount support
CCCA1	Condenser coil with Aluminium Energy Guard DCC treatment	IOTX	IoT industrial module for cloud based interoperability & services
TCDC	Condensate collection pan with electric heater		

Accessories whose code ends with "X" are supplied separately

DC INVERTER

Clivet participates in the EUROVENT "Liquid Chilling Packages and Hydronic Heat Pumps". The products concerned feature on the website www.eurovent-certification.com

compliant
ErP

ELFOENERGY SHEEN EVO

Liquid chiller

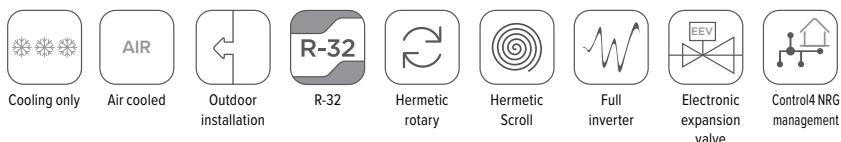

Air cooled

Outdoor installation

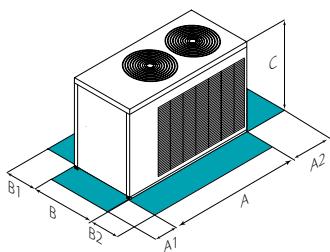

Capacity from 43,0 to 130 kW

- ✓ Full inverter technology with scroll or rotary compressors
- ✓ First investment driven and refurbishment applications
- ✓ Refrigerant R32 - GWP = 675
- ✓ High seasonal efficiency
- ✓ Low water temperature down to -8°C
- ✓ Three acoustic configurations: standard, silenced and super-silenced
- ✓ Modular operation management, up to 16 units in cascade

NEW PRODUCT

LARGE EVO PL

Polyvalent reversible heat pump

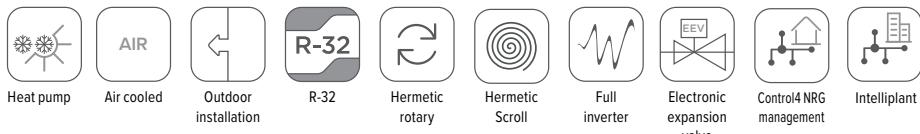

Air cooled

Outdoor installation

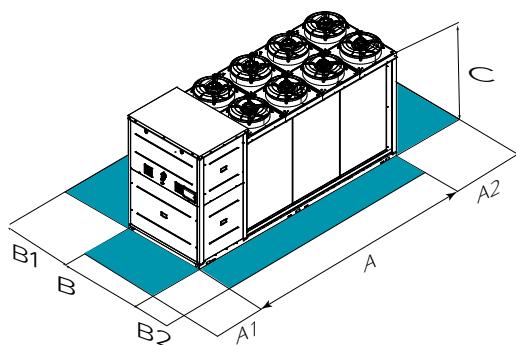

Capacity from 51,7 to 238 kW

- ✓ Full inverter technology with scroll or rotary compressors
- ✓ Polyvalent technology configurable for 4-pipe
- ✓ Refrigerant R32 - GWP = 675
- ✓ Hot water up to 60°C, chilled water down to -8°C, operation at -20°C
- ✓ Double independent circuits for high reliability
- ✓ Three sound levels: standard, silent and super-silent
- ✓ Modular operation management, up to 7 units in cascade
- ✓ Integrated hot side and cold side hydronic assemblies

CMSC11	Serial communication module for BACnet-IP supervisor

Accessories whose code ends with "X" are supplied separately

PFGP	Soundproofing paneling of the pumping unit
IFWX	Steel mesh strainer on the water side
RCMRX	Remote control via microprocessor control
PSX	Mains power supply
RPR	Refrigerant leak detector
AVIBX	Anti-vibration mount support
AMMSX	Anti-seismic spring antivibration mounts
PGFC	Finned coil protection grill
PGFCX	Finned coil protection grill
PGCCH	Anti-hail protection grilles
PGCCHX	Anti-hail protection grilles
TCDC	Condensate collection pan with electric heater
IOTX	IoT industrial module for cloud based interoperability & services

DC INVERTER

LARGE EVO FC

Liquid chiller with FREE-COOLING

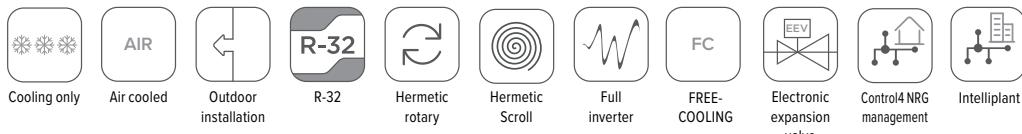

Air cooled

Outdoor installation

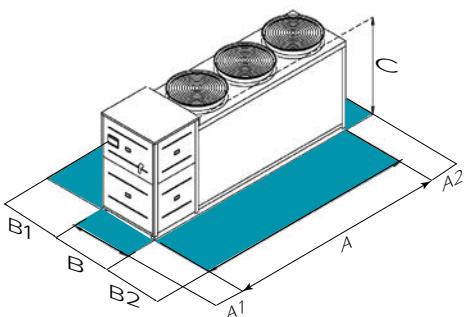

Capacity from 115 to 233 kW

- ✓ Full inverter technology with scroll or rotary compressors
- ✓ Solution for cold climates, versatile applications with modular concept
- ✓ Refrigerant R32 - GWP = 675
- ✓ Operation down to -25°C outdoor air temperature, low water temperature down to -8°C
- ✓ Direct Free cooling active at air temperatures above 0°C
- ✓ Two acoustic levels: standard and super-silenced
- ✓ Modular operation management, up to 8 units in cascade
- ✓ Integrated hydronic assembly and system tank

DC INVERTER

ELFOENERGY STORM EVO FC

Liquid chiller with FREE-COOLING

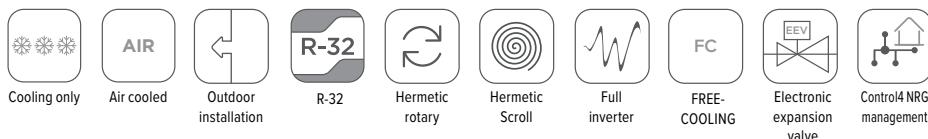

Air cooled

Outdoor installation

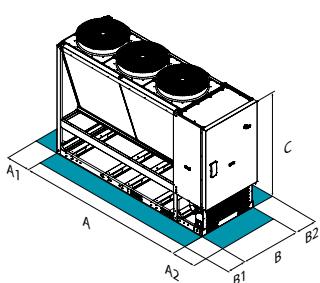

Capacity from 57,4 to 89,7 kW

- ✓ Full inverter technology with scroll or rotary compressors
- ✓ Solution for cold climates, versatile applications with modular concept
- ✓ Refrigerant R32 - GWP = 675
- ✓ High full load and seasonal efficiency with compact dimensions
- ✓ Operation down to -25°C outdoor air temperature, low water temperature down to 5°C
- ✓ Direct Free cooling active at air temperatures above 0°C
- ✓ Modular design to connect up to 16 units in parallel, compatible with chiller version
- ✓ Integrated hydronic assembly and system tank

(1) Data calculated in compliance with Standard EN 14511:2022 referred to the following conditions:
Internal exchanger water temperature = 12/7°C; Outdoor heat exchanger inlet air temperature = 35°C
(2) Data calculated in compliance with Standard EN 14511:2022 referred to the following conditions:
Internal exchanger water temperature = 40/45°C; Outdoor heat exchanger inlet air temperature 7 D.B. / 6 °C W.B.

(3) Sound pressure levels are referred to units operating at nominal load in nominal conditions.
Measurements are carried out accordingly to UNI EN ISO 9614-1 at nominal standard conditions
defined in respective regulations: EU 2016/2281, UE 813/2013, UE 811/2013.

(4) Data calculated according to the EN 14825:2018 Regulation

The Product is compliant with the ErP (Energy Related Products) European Directive. It includes the Commission delegated Regulation (EU) No 811/2013 (rated heat output ≤70 kW at specified reference conditions), the Commission delegated Regulation (EU) No 813/2013 (rated heat output ≤400 kW at specified reference conditions) and the Commission delegated Regulation (EU) No 2016/2281, also known as Ecodesign Lot21.

versions and configurations

VERSION:

EXC	Excellence (Standard)
PRM	Premium

EXTERNAL SECTION FAN CONSUMPTION REDUCTION:

CREFB	Device for fan consumption reduction of the external section, ECOBREEZE type (Standard)
--------------	---

ENERGY RECOVERY:

- Energy recovery: not required (Standard)
- D** Partial energy recovery
- R** Total energy recovery (WSAT-YSC4 only)

EVAPORATOR

EVPHE	Plate heat exchanger (Standard)
EVFTP	Shell and tube evaporator PED test

ACOUSTIC CONFIGURATION:

ST	Standard acoustic configuration (WSAT-YSC4 only)
SC	Acoustic configuration with compressor soundproofing (Standard)
EN	Super-silenced acoustic configuration

LOW TEMPERATURE (WSAT-YSC4 ONLY):

- Energy recovery: not required (Standard)
- B** Water low temperature

accessories

1PM	Hydropack with 1 pump
1PMV	Hydropack user side with nr.1 inverter pump
1PMH	Hydropack with nr.1 high static pressure pump
1PMVH	Hydropack user side with nr.1 high static pressure inverter pump
2PM	Hydropack user side with 2 pumps
2PMV	Hydropack user side with no.2 of inverter pumps
2PMH	Hydropack user side with nr.2 high static pressure pump
2PMVH	Hydropack lato utilizzo con n°2 pompe ad inverter alta prevalenza
IVFDT	Inverter driven variable flow-rate user side control depending on the temperature differential
IFWX	Steel mesh strainer on the water side
CSVX	Couple of manually operated shut-off valves
ACC	Storage tank
AMMX	Spring antivibration mounts
AMMSX	Anti-seismic spring antivibration mounts
CONTA2	Energy meter
RCMRX	Remote control via microprocessor control
PSX	Mains power supply
CMSC10	Serial communication module for LonWorks supervisor
CMSC9	Serial communication module for Modbus supervisor
CMSC11	Serial communication module for BACnet-IP supervisor
SCP4	Set-point compensation with 0-10 V signal
SPC1	Set point compensation with 4-20 mA signal
ECS	ECOSHARE function for the automatic management of a group of units
PFCP	Power factor correction capacitors (cosfi > 0.9)
SFSTR	Disposal for inrush current reduction

Accessories whose code ends with "X" are supplied separately

RE-25	Electrical panel antifreeze protection for min. outdoor temperature down to -25°C
--------------	---

MHP	High and low pressure gauges
------------	------------------------------

SDV	Cutoff valve on compressor supply and return
------------	--

RPRI	Refrigerant leak detector in the casing
-------------	---

DML4-20	Demand limit with 4-20 mA
----------------	---------------------------

DML0-10	Demand limit with 0-10 V
----------------	--------------------------

PFGP	Soundproofing paneling of the pumping unit
-------------	--

PSWSA	Differential pressure switch water side with antifreeze protection
--------------	--

IOTX	IoT industrial module for cloud based interoperability & services
-------------	---

Only WSAT-YSC4:

PPBM	Microchannel coils protection panels
-------------	--------------------------------------

PGCC	Finned coil protection grilles and compressor compartment
-------------	---

CCME	Microchannel e-coated coil
-------------	----------------------------

RE-39	Electrical panel antifreeze protection for min. outdoor temperature down to -39°C
--------------	---

IVFEDT	Variable flow-rate control of the inverter pump external to the unit depending on the temperature differential
---------------	--

Only WSAN-YSC4:

CCCA	Copper / aluminium condenser coil with acrylic lining
-------------	---

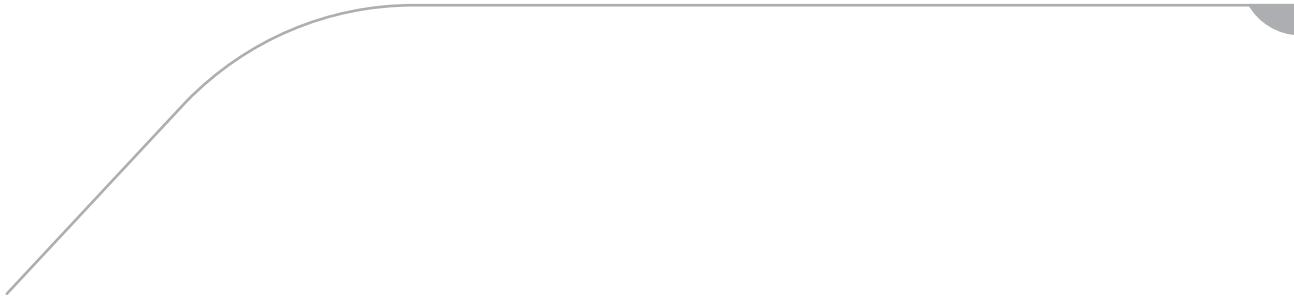

CCCA1	Condenser coil with Aluminium Energy Guard DCC treatment
--------------	--

PGCCH	Anti-hail protection grilles
--------------	------------------------------

PGFC	Finned coil protection grill
-------------	------------------------------

HYDRONIC

Clivet participates in the EUROVENT "Liquid Chilling Packages and Hydronic Heat Pumps". The products concerned feature on the website www.eurovent-certification.com

compliant
ErP

SPINCHILLER⁴ PL

Polyvalent reversible heat pump

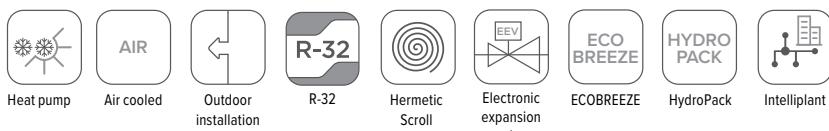

Air cooled

Outdoor installation

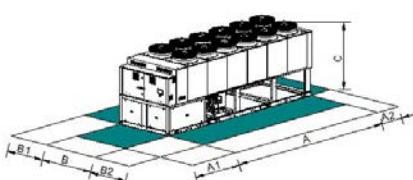

Capacity from 225 to 664 kW

- ✓ Scroll compressors, EC axial fans and two independent circuits for high reliability
- ✓ Polyvalent technology configurable for 4-pipe
- ✓ Refrigerant R32 - GWP = 675
- ✓ Domestic hot water up to 55°C
- ✓ Plate exchanger
- ✓ Two acoustic configurations: standard and super-silenced
- ✓ Modular operation management, up to 7 units in cascade
- ✓ Integrated hot side and cold side hydronic assemblies

It includes the Commission delegated Regulation (EU) No 811/2013 (rated heat output <70 kW at specified reference conditions), the Commission delegated Regulation (EU) No 813/2013 (rated heat output <400 kW at specified reference conditions) and the Commission delegated Regulation (EU) No 2016/2281, also known as Ecodesign Lot21.

accessories

CCCA	Copper / aluminium condenser coil with acrylic lining	RPRI	Refrigerant leak detector in the casing
CCCA1	Condenser coil with Aluminium Energy Guard DCC treatment	SFSTR	Disposal for inrush current reduction
IVFCDT	Variable flow rate control heating side by inverter according to the temperature differential	PFCC	Power factor correction capacitors (cosfi > 0.95)
IVFHDT	Variable flow-rate control on hot use side by inverter based on the temperature difference	SPC1	Set-point compensation with 4-20 mA
IVFCDTS	Variable flow control heating side by inverter according to the temperature differential with pressure drop sensor	SCP4	Set-point compensation with 0-10 V
IVFHDT5	Variable flow control heating side by inverter according to the temperature differential with pressure drop sensor	PSX	Mains power supply
IVFCDTF	Variable flow rate control cooling side by inverter according to the temperature differential with a flow meter	AMMX	Spring antivibration mounts
IVFHDTF	Variable flow control heating side by inverter according to the temperature differential with pressure drop sensor	AMMSX	Anti-seismic spring antivibration mounts
IFWX	Steel mesh strainer on the water side	PGFC	Finned coil protection grill
CMSC10	Serial communication module for LonWorks supervisor	PGCCH	Anti-hail protection grilles
CMSC9	Serial communication module for Modbus supervisor	PSWSA	Differential pressure switch water side with antifreeze protection
CMSC11	Serial communication module for BACnet-IP supervisor	2PMCS	Hydropack cooling side with 2 on-off pumps
RCMRX	Remote control via microprocessor control	2PMCS2V	Hydropack on cold user side with 2 pumps and 2 inverters
CONT43	M-bus total electricity meter	1+1PMCS	Hydropack cooling side with 1 + 1 on-off pump
CONT44	Total electricity meters and m-bus pump group	1+1PMCSV	Hydropack cooling side with 1 + 1 inverter pump
RE-25	Electrical panel antifreeze protection for min. outdoor temperature down to -25°C	2PMHS	Hydropack heating side with 2 on-off pumps
DML4-20	Demand limit with 4-20 mA	2PMHS2V	Hydropack on hot user side with 2 pumps and 2 inverters
DML0-10	Demand limit with 0-10 V	1+1PMHHS	Hydropack heating side with 1 + 1 on-off pump
ECS	ECOSHARE function for the automatic management of a group of units	1+1PMHSV	Hydropack heating side with 1 + 1 inverter pump
		FMCHX	Cooling and heating side flow meters
		RDVS	Switching valve with dual safety valves
		MISTER1	Indirect energy meter through pressure drops and unit probes temperature differential
		MISTER2	Direct energy meter by flow rate and temperature differential with unit probes (available only with options: FMCHX)

SPINCHILLER⁴

Reversible heat pump

Air cooled

Outdoor installation

Capacity from 670 to 1260 kW

- ✓ Four independent circuits for high reliability with scroll compressors and EC Axial fans
- ✓ High full load and seasonal efficiency (Excellence version), high seasonal efficiency and compact dimensions (Premium version)
- ✓ Refrigerant R32 - GWP = 675
- ✓ Domestic hot water up to 55°C
- ✓ Plate heat exchanger or shell & tube exchanger
- ✓ Two acoustic configurations
- ✓ Modular operation management, up to 4 units in cascade
- ✓ Integrated hydronic assembly, system tank and partial heat recovery

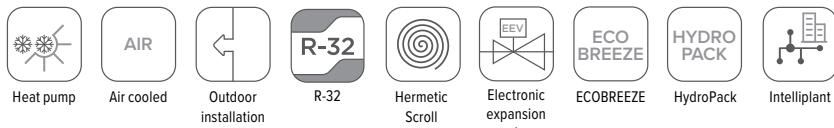

Clivet participates in the EUROVENT "Liquid Chilling Packages and Hydronic Heat Pumps". The products concerned feature on the website www.eurovent-certification.com

SPINCHILLER⁴

Liquid chiller

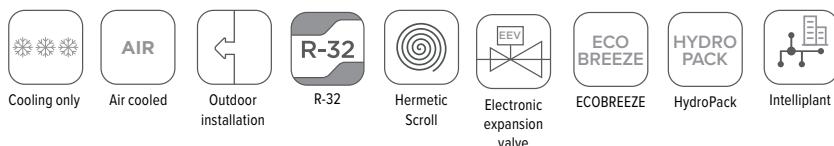

Air cooled

Outdoor installation

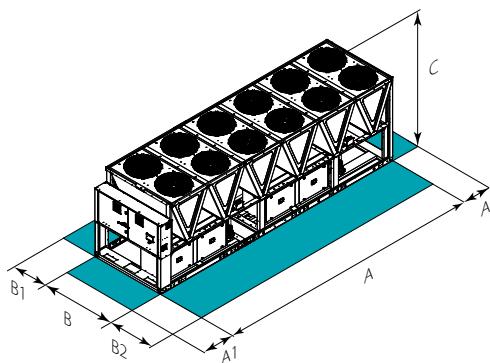

Capacity from 720 to 939 kW

- ✓ Scroll compressors, microchannel coils and two independent circuits for high reliability
- ✓ Excellence version with very high seasonal efficiency, Premium version with high seasonal efficiency, with extremely compact dimensions
- ✓ Refrigerant R32 - GWP = 675
- ✓ Operation down to +50°C outdoor air temperature, low water temperature down to -8°C
- ✓ Plate heat exchanger or shell & tube exchanger
- ✓ Three acoustic configurations
- ✓ Modular operation management, up to 8 units in cascade
- ✓ Integrated hydronic assembly, system tank and partial heat recovery

SCREWLINE⁴-I MF

Polyvalent reversible heat pump

Air cooled

Outdoor installation

Capacity from 522 to 989 kW

Screw INVERTER

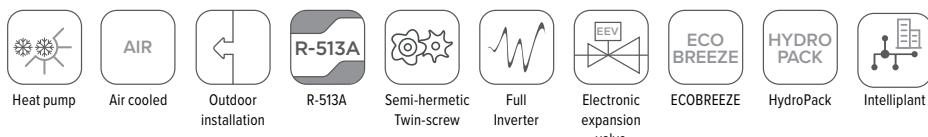

Clivet participates in the EUROVENT "Liquid Chilling Packages and Hydronic Heat Pumps". The products concerned feature on the website www.eurovent-certification.com

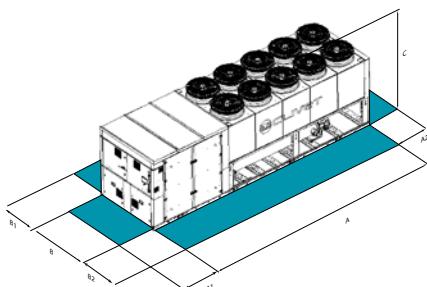

compliant
ErP

- ✓ Screw compressors with inverter technology and EC Axialfans type
- ✓ Polyvalent technology configurable for 4-pipe
- ✓ Double independent circuits for high reliability
- ✓ Refrigerant R513A - GWP = 631
- ✓ High full load and seasonal efficiency (Excellence version) for all 3 acoustic versions
- ✓ Domestic hot water up to 60°C, low water temperature down to -8°C
- ✓ Modular operation management, up to 7 units in cascade
- ✓ Integrated hot side and cold side hydronic assemblies

(1) Data compliant to Standard EN 14511:2022 referred to the following conditions: Cold side water temperature = 12/7°C; Entering external exchanger air temperature = 35°C

(2) Data compliant to Standard EN 14511:2022 referred to the following conditions: Hot side water temperature = 40/45°C; Entering external exchanger air temperature = 7°C D.B./6°C W.B.

(3) Data compliant to Standard EN 14511:2022 referred to the following conditions: Cold side water temperature = 7°C; Hot side water temperature = 74/55°C

(4) TER = (Cooling capacity + Heating capacity) / (Total power input)

(5) Sound pressure levels are referred to units operating at nominal load in nominal conditions. Measurements are carried out according to UNI EN ISO 9614-1 at nominal standard conditions defined in respective regulations: EU 2016/2281, UE 813/2013, UE 811/2013

(6) Data calculated according to the EN 14825:2018 Regulation

The Product is compliant with the ErP (Energy Related Products) European Directive. It includes the Commission delegated Regulation (EU) No 811/2013 (rated heat output ≤70 kW at specified reference conditions), the Commission delegated Regulation (EU) No 813/2013 (rated heat output ≤400 kW at specified reference conditions) and the Commission delegated Regulation (EU) No 2016/2281, also known as Ecodesign Lot21.

accessories

SPC1	Set-point compensation with 4-20 mA
SPC4	Set-point compensation with 0-10 V
SPC2	Set-point compensation with outdoor air temperature probe
IVFCDT	Variable flow rate control heating side by inverter according to the temperature differential
IVFHDT	Variable flow-rate control on hot use side by inverter based on the temperature difference
IVFCCTS	Variable flow control heating side by inverter according to the temperature differential with pressure drop sensor
IVFHHTS	Variable flow control heating side by inverter according to the temperature differential with pressure drop sensor
IVFCDF	Variable flow rate control cooling side by inverter according to the temperature differential with a flow meter
IVFHDTF	Variable flow control heating side by inverter according to the temperature differential with pressure drop sensor
CONTA3	M-bus total electricity meter
CONTA4	Total electricity meters and m-bus pump group
IFWX	Steel mesh strainer on the water side
CSVX	Couple of manually operated shut-off valves
AMMX	Spring antivibration mounts
AMMSX	Anti-seismic spring antivibration mounts
RCMRX	Remote control via microprocessor control
PSX	Mains power supply
CMSC9	Serial communication module for Modbus supervisor
CMSC10	Serial communication module for LonWorks supervisor
CMSC11	Serial communication module for BACnet-IP supervisor

RPR1	Refrigerant leak detector in the casing
FMCHX	Cooling and heating side flow meters
RE-25	Electrical panel antifreeze protection for min. outdoor temperature down to -25°C
ECS	ECOSHARE function for the automatic management of a group of units
FC2	EMC filtering to reduce conducted compressor emissions
PGFC	Finned coil protection grill
PGCCH	Anti-hail protection grilles
RDVS	Switching valve with dual safety valves
CCCA	Copper / aluminium condenser coil with acrylic lining
CCCA1	Condenser coil with Aluminium Energy Guard DCC treatment
1+1PMHSV	Hydropack heating side with 1+1 inverter pump
2PMHSV	Hydropack cooling side with 2 inverter pumps
1+1PMHS	Hydropack heating side with 1+1 on-off pump
2PMHS	Hydropack heating side with 2 on-off pumps
1+1PMCSV	Hydropack cooling side with 1+1 inverter pump
2PMCSV	Hydropack heating side with 2 inverter pumps
1+1PMCS	Hydropack cooling side with 1+1 on-off pump
2PMCS	Hydropack cooling side with 2 on-off pumps
MISTER1	Indirect energy meter through pressure drops and unit probes temperature differential
MISTER2	Direct energy meter by flow rate and temperature differential with unit probes (available only with options: FMCHX)
MISTER3	Direct energy meter via m-bus (available only with options: FMCHX)
IOTX	IoT industrial module for cloud based interoperability & services

Accessories whose code ends with "X" are supplied separately

SCREWLINE^{4-I}**Liquid chiller**

Air cooled

Outdoor installation

Capacity from 204 to 1055 kW

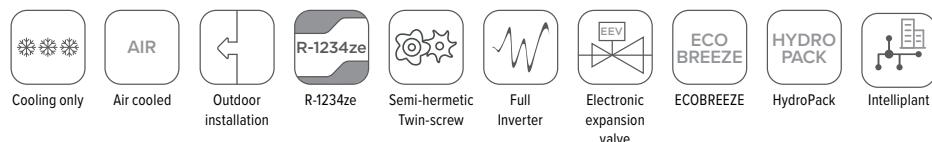

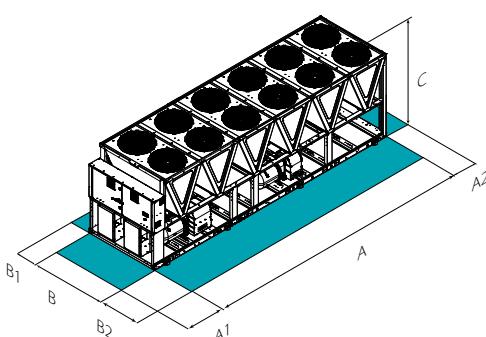

Screw INVERTER

Clivet participates in the EUROVENT "Liquid Chilling Packages and Hydronic Heat Pumps". The products concerned feature on the website www.eurovent-certification.com

compliant
ErP

- ✓ Screw compressors with inverter technology, Microchannel coils and EC Axial fans type
- ✓ Quite zero environmental impact solution, with one or two independent circuits for high reliability
- ✓ Refrigerant R1234ze - GWP = 7
- ✓ High full load and seasonal efficiency (Excellence version)
- ✓ Operation down to 50°C outdoor air temperature, low water temperature down to -2°C
- ✓ Three acoustic configurations
- ✓ Modular operation management, up to 7 units in cascade
- ✓ Integrated hydronic assembly and partial recovery

(1) Data calculated in compliance with Standard EN 14511:2022 referred to the following conditions:
Internal exchanger water temperature = 12/7°C; Outdoor heat exchanger inlet air temperature = 35°C
(2) Sound pressure levels are referred to units operating at nominal load in nominal conditions.
Measurements are carried out accordingly to UNI EN ISO 9614-1 at nominal standard conditions defined in respective regulations: EU 2016/2281, UE 813/2013, UE 811/2013

(3) Data calculated according to the EN 14825:2018 Regulation

The Product is compliant with the Erp (Energy Related Products) European Directive. It includes the Commission delegated Regulation (EU) No 2016/2281, also known as Ecodesign Lot21.

accessories

1PM Hydropack with 1 pump
1PMV Hydropack user side with nr.1 inverter pump
1PMH Hydropack with nr.1 high static pressure pump
1PMVH Hydropack user side with nr.1 high static pressure inverter pump
2PM Hydropack user side with 2 pumps
2PMV Hydropack user side with no.2 of inverter pumps
2PMH Hydropack user side with nr.2 high static pressure pump
2PMVH Hydropack lato utilizzo con n°2 pompe ad inverter alta prevalenza
IVFT Inverter driven variable flow-rate user side control depending on the temperature differential
IFWX Steel mesh strainer on the water side
CSVX Couple of manually operated shut-off valves
AMMX Spring antivibration mounts
AMMSX Anti-seismic spring antivibration mounts
CONTA2 Energy meter
RCMRX Remote control via microprocessor control
PSX Mains power supply

CMSC9 Serial communication module for Modbus supervisor
CMSC10 Serial communication module for LonWorks supervisor
CMSC11 Serial communication module for BACnet-IP supervisor
RPR1 Refrigerant leak detector in the casing
SCP4 Set-point compensation with 0-10 V signal
SPC2 Set-point compensation with outdoor air temperature probe
PPBM Microchannel coils protection panels
CCME Microchannel e-coated coil
MHP High and low pressure gauges
RE-25 Electrical panel antifreeze protection for min. outdoor temperature down to -25°C
ECS ECOSHARE function for the automatic management of a group of units
FC2 EMC filtering to reduce conducted compressor emissions
PGCC Finned coil protection grilles and compressor compartment
RDVS Switching valve with dual safety valves
REGBT Device for the condensing coil partialization
IOTX IoT industrial module for cloud based interoperability & services

Accessories whose code ends with "X" are supplied separately

It can only be sold in an industrial application

SCREWLINE³ FC

Liquid chiller with FREE-COOLING

Air cooled

Outdoor installation

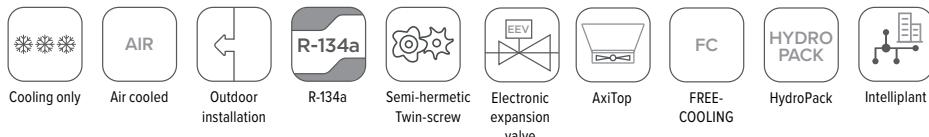

Capacity from 520 to 1523 kW

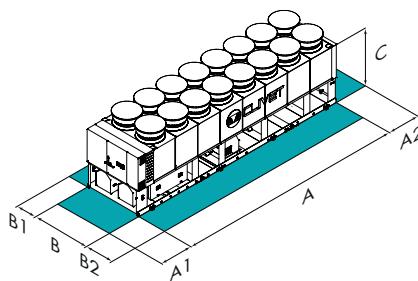

Conforme
ErP

- ✓ Double independent circuits for high reliability with screw compressors
- ✓ Solution for cold climates and industrial application
- ✓ Refrigerant R134a - GWP = 1430
- ✓ Operation down to -39°C outdoor air temperature, low water temperature down to -8°C
- ✓ Direct Free-cooling and No-glycol Free-cooling
- ✓ Two acoustic configurations
- ✓ Modular operation management, up to 7 units in cascade
- ✓ Integrated hydronic assembly and partial recovery

SC-FCD-EXC Compressors soundproofing (SC)-Direct FREE-COOLING-Excellence

CAUTION!

For trouble-free operation of the unit it is essential to maintain the safety distances indicated by the green areas.

versions and configurations

VERSION:

EXC Excellence (Standard)

LOW TEMPERATURE:

- Low temperature: not required (Standard)
- B** Water low temperature

ENERGY RECOVERY:

- Energy recovery: not required (Standard)
- D** Partial energy recovery

ACOUSTIC CONFIGURATION:

- SC** Acoustic configuration with compressor soundproofing (Standard)
- EN** Extremely low noise acoustic configuration (sizes 200.2÷500.2)

FREE-COOLING:

- FCD** Direct FREE-COOLING (Standard)
- FCI** No-glycol FREE-COOLING

EXTERNAL SECTION FAN CONSUMPTION REDUCTION:

- CREFP** Device for fan consumption reduction of the external section at variable speed (phase-cutting) (standard in the SC acoustic config.)
- CREFB** Device for fan consumption reduction of the external section, ECOBREEZE type (standard in the EN acoustic config.)

TYPE FAN EXTERNAL SECTION:

- AXIX** High efficiency diffuser for axial fan - AxiTop (Standard)
- NAXI** High efficiency diffuser for axial fan - AxiTop: not required

(1) Data referred to the following conditions: Internal exchanger water temperature = 12/7°C; External exchanger water temperature = 30/35°C
External exchanger water temperature = 30/35°C. Performances according to EN 14511:2022
W10/W35 water at the user side heat exchanger 30/35°C; inlet water at the source side heat exchanger 10°C
W10/W45 water at the user side heat exchanger 40/45°C; inlet water at the source side heat exchanger 10°C
W10/W55 water at the user side heat exchanger 45/55°C; inlet water at the source side heat exchanger 10°C
W35/W18 water at the user side heat exchanger 23/18°C; inlet water at the source side heat exchanger 30/35°C
W35/W7 water at the user side heat exchanger 12/7°C; inlet water at the source side heat exchanger 30/35°C

(2) Data calculated according to the EN 14825:2018 Regulation

(3) Sound pressure levels are referred to units operating at nominal load in nominal conditions. Measurements are carried out according to UNI EN ISO 9614-1 at nominal standard conditions defined in respective regulations: EU 2016/2281, UE 813/2013, UE 811/2013.
Sound power level are not Eurovent certified.

The Product is compliant with the ErP (Energy Related Products) European Directive. It includes the Commission delegated Regulation (EU) No 811/2013 (rated heat output ≤70 kW at specified reference conditions), the Commission delegated Regulation (EU) No 813/2013 (rated heat output ≤400 kW at specified reference conditions).

accessories

3WV	Three-way valve	KTFL1X	1" water side hose kit (sizes 17÷71)
IVMSX	Source side 2-way modulating valve	KTFL2X	1 1/4" water side hose kit
IVWX	Water side motorized valve	CACSX	Domestic hot water kit control
AMRX	Rubber antivibration mounts	ACS300X	300-litre domestic hot water storage tank (sizes 17÷41)
CMMBX	Serial communication module to supervisor (Modbus)	ACS500X	500-litre domestic hot water storage tank (sizes 17÷81)
PBLC1X	Service keypad (cable from 1,5 metres)	ACS55SX	500-litre domestic hot water storage tank (sizes 17÷81)
PMX	Phase monitor	ACS3SX	300-litre domestic hot water storage tank (sizes 17÷41)
SCP3X	Set point compensation according to the outside enthalpy	KVMSP1X	Kit for management of radiant panels with connections of 1" (sizes 17÷51)
SPCX	Set-point compensation with outdoor air temperature probe	KVMSP2X	Kit for management of radiant panels with connections of 1 1/4"
SFSTR4N	Disposal for inrush current reduction, for unit 400/3/50+N	KSAX	100-litre circuit breaker
KDT3VX	Double temperature control kit, set point compensation with 4-20mA, 3	KVICX	Boiler control kit (sizes 17÷81)
KDT3V	Double temperature control kit, set point compensation with 4-20mA, 3	KITERAX	Electronic wall-mounting room thermostat
3DHWX	Three-way valve for domestic hot water	IOTX	IoT industrial module for cloud based interoperability & services
SFSTR1	Disposal for inrush current reduction, for unit 230/1/50 (sizes 17÷51)

exchanger = 40/45°C; Water temperature to external exchanger = 10/7°C

(3) Sound pressure levels are referred to units operating at nominal load in nominal conditions. Measurements are carried out according to UNI EN ISO 9614-1 at nominal standard conditions defined in respective regulations: EU 2016/2281, UE 813/2013, UE 811/2013.

Sound power level are not Eurovent certified.

(4) Data calculated according to the EN 14825:2018 Regulation

The Product is compliant with the ErP (Energy Related Products) European Directive. It includes the Commission delegated Regulation (EU) No 811/2013 (rated heat output ≤70 kW at specified reference conditions), the Commission delegated Regulation (EU) No 813/2013 (rated heat output ≤400 kW at specified reference conditions) and the Commission delegated Regulation (EU) No 2016/2281, also known as Ecodesign Lot21.

accessories

SDV	Cutoff valve on compressor supply and return
MOBMAG	Larger units
MF2	Multi-function phase monitor
RCTX	Remote control
CMSC10	Serial communication module for LonWorks supervisor
CMSC8	Serial communication module for BACnet supervisor
CMSC9	Serial communication module for Modbus supervisor
CMMBX	Serial communication module to supervisor (Modbus)
CMSLWX	LonWorks serial communication module
BACX	Serial communication module for BACnet supervisor
SPCX	Set-point compensation with outdoor air temperature probe
IFWX	Steel mesh strainer on the water side
SFSTR	Disposal for inrush current reduction
PFPC	Power factor correction capacitors ($\cos\phi > 0.9$)
AVIBX	Anti-vibration mount support
IOTX	IoT industrial module for cloud based interoperability & services

Only WSH-XEE2:

VS2MC	Cooling side 2-way modulating valve
VS2MCX	Cooling side 2-way modulating valve
VS3MC	Cooling side 3-way modulating valve
VS3MCX	Cooling side 3-way modulating valve
VARYC	VARYFLOW + (cooling side 2 inverter pumps)
VS2MH	Heating side 2-way modulating valve
VS2Mhx	Heating side 2-way modulating valve
VS3MH	Heating side 3-way modulating valve
VS3Mhx	Heating side 3-way modulating valve
VARYH	VARYFLOW + (heating side 2 inverter pumps)
VACSHX	Heating side DHW switching valve

Only WSHN-XEE2:

VACSUX	User side DHW switching valve
VARYU	VARYFLOW + (user side 2 inverter pumps)
VS2M	Source side 2-way modulating valve
VS2MX	Source side 2-way modulating valve
VS3M	Source side 3-way modulating valve
VS3MX	Source side 3-way modulating valve
VARYS	VARYFLOW + (source side 2 inverter pumps)

(1) Performance data calculated in accordance with EN 14511:2022 referred to the following conditions:

Internal exchanger water temperature = 45/40°C. External exchanger water temperature = 70/78°C

(2) Sound pressure levels are referred to units operating at nominal load in nominal conditions. Measurements are carried out according to UNI EN ISO 9614-1 at nominal standard conditions defined in respective regulations: EU 2016/2281, UE 813/2013, UE 811/2013.

Sound power level are not Eurovent certified.

(3) Data calculated according to the EN 14825:2018 Regulation

The Product is compliant with the ErP (Energy Related Products) European Directive. It includes the Commission delegated Regulation (EU) No 811/2013 (rated heat output ≤70 kW at specified reference conditions), the Commission delegated Regulation (EU) No 813/2013 (rated heat output ≤400 kW at specified reference conditions).

accessories

SDV	Cutoff valve on compressor supply and return	SPCX	Set-point compensation with outdoor air temperature probe
MF2	Multi-function phase monitor	IFWX	Steel mesh strainer on the water side
RCTX	Remote control	SFSTR	Disposal for inrush current reduction
CMSC10	Serial communication module for LonWorks supervisor	PFCC	Power factor correction capacitors ($\cos\phi > 0.95$)
CMSC8	Serial communication module for BACnet supervisor	AVIBX	Anti-vibration mount support
CMSC9	Serial communication module for Modbus supervisor	MOBMAG	Larger units
CMMBX	Serial communication module to supervisor (Modbus)	VARYS	VARYFLOW + (cooling side 2 inverter pumps)
CMSLWX	LonWorks serial communication module	VARYU	VARYFLOW + (heating side 2 inverter pumps)
BACX	Serial communication module for BACnet supervisor	IOTX	IoT industrial module for cloud based interoperability & services

ELFOENERGY GROUND MEDIUM² MF

Polyvalent reversible heat pump

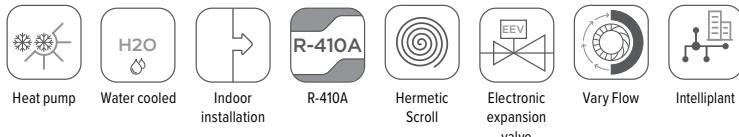

Water cooled

Indoor installation

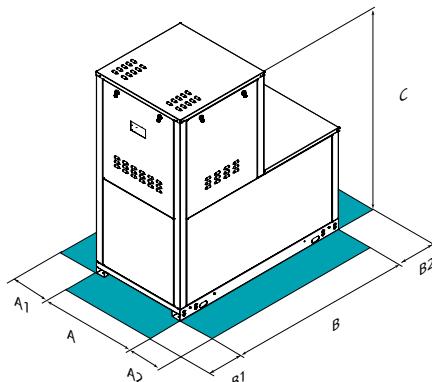

Capacity from 34,3 to 241 kW

- ✓ Scroll compressors and plate heat exchangers
- ✓ Polyvalent technology configurable for 4-pipe or 2-pipe systems for maximum versatility
- ✓ Refrigerant R410A - GWP = 2088
- ✓ High efficiency thanks to total heat recovery
- ✓ Domestic hot water up to 60°C, low water temperature down to 4°C
- ✓ Modular operation management, up to 8 units in cascade
- ✓ Integrated source side, user side and recovery side hydronic assemblies

AP	Rear water fittings
SDV	Cutoff valve on compressor supply and return
MHP	High and low pressure gauges
MF2	Multi-function phase monitor
SFSTR	Disposal for inrush current reduction
RCMRX	Remote control via microprocessor control
ACIE	Antifreeze heater for internal exchanger protection
EHCS	Source side antifreeze electric heaters
CMSC10	Serial communication module for LonWorks supervisor
CMSC9	Serial communication module for Modbus supervisor
CMSC11	Serial communication module for BACnet-IP supervisor
SCP4	Set-point compensation with 0-10 V signal
SPC2	Set-point compensation with outdoor air temperature probe
CSVX	Couple of manually operated shut-off valves
IFWX	Steel mesh strainer on the water side
PFCP	Power factor correction capacitors ($\cos\phi > 0.9$)
AVIBX	Anti-vibration mount support
CONTA2	Energy meter
RPRPDI	Refrigerant leak detector with pump down function in the casing
ECS	ECOSHARE function for the automatic management of a group of units
PSX	Mains power supply
IVFDT	Inverter driven variable flow-rate user side control depending on the temperature differential
IOTX	IoT industrial module for cloud based interoperability & services

Only WSH-XSC3:

HYGC1	Cooling side hydronic assembly with 1 ON/OFF pump
HYGC2	Cooling side hydronic assembly with 2 ON/OFF pumps
VS2MC	Cooling side 2-way modulating valve
VS2MX	Cooling side 2-way modulating valve
VS3MX	Cooling side 3-way modulating valve
VARYC	VARYFLOW + (cooling side 2 inverter pumps)
2PMC	Hydropack cooling side with 2 pumps
V2MCP	Cooling side 2-way modulating valve for high DP
V2MCPX	Cooling side 2-way modulating valve for high DP
HYGH1	Heating side hydronic assembly with 1 ON/OFF pump
HYGH2	Heating side hydronic assembly with 2 ON/OFF pumps
VARYH	VARYFLOW + (heating side 2 inverter pumps)
VS2MH	Heating side 2-way modulating valve
VS2MHX	Heating side 2-way modulating valve
VS3MHX	Heating side 3-way modulating valve
2PMH	Hydropack heating side with 2 pumps
V2MHP	Heating side 2-way modulating valve for high DP
V2MHPX	Heating side 2-way modulating valve for high DP

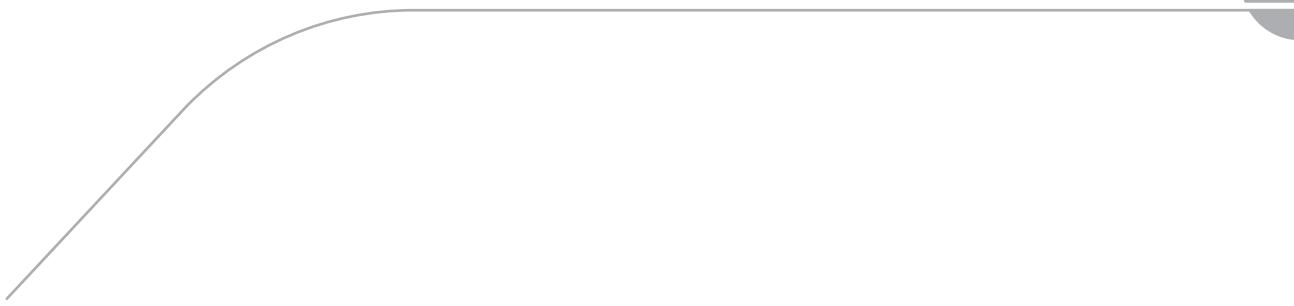

Only WSHN-XSC3:

HYGU1	User side hydronic assembly with 1 ON/OFF pump
HYGU2	User side hydronic assembly with 2 ON/OFF pumps
VARYU	VARYFLOW + (user side 2 inverter pumps)
HYP2U	Hydropack user side with 2 pumps
HYGS1	Source side hydronic assembly with 1 ON/OFF pump
HYGS2	Source side hydronic assembly with 2 ON/OFF pumps
VARYS	VARYFLOW + (source side 2 inverter pumps)
VS2M	Source side 2-way modulating valve
VS2MX	Source side 2-way modulating valve
VS3MX	Source side 3-way modulating valve
HYP2S	Hydropack source side with 2 pumps
V2MSP	Source side 2-way modulating valve for high DP
V2MSPX	Source side 2-way modulating valve for high DP

NEW PRODUCT

Screw INVERTER

Clivet participates in the EUROVENT "Liquid Chilling Packages and Hydronic Heat Pumps". The products concerned feature on the website www.eurovent-certification.com

compliant
ErP

SCREWLINE⁴-I PL

Polyvalent reversible heat pump

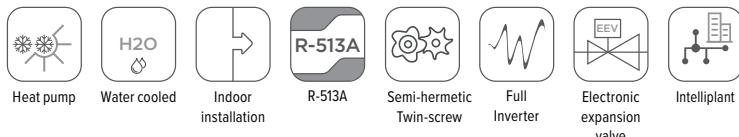

Water cooled

Indoor installation

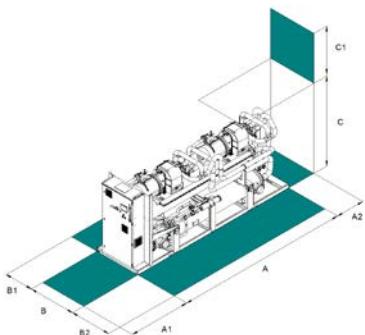

Capacity from 440 to 945 kW

- ✓ Screw compressors with inverter technology and shell & tube heat exchanger
- ✓ Polyvalent technology configurable for 4-pipe
- ✓ Double independent circuits for high reliability
- ✓ Refrigerant R513A - GWP = 631
- ✓ High full load and seasonal efficiency
- ✓ Domestic hot water up to 55°C, low water temperature down to 4°C
- ✓ Two acoustic configurations: standard and super-silenced
- ✓ Modular operation management, up to 7 units in cascade

CHILLER CENTRIFUGO HFO

Liquid chiller

Water cooled

Indoor installation

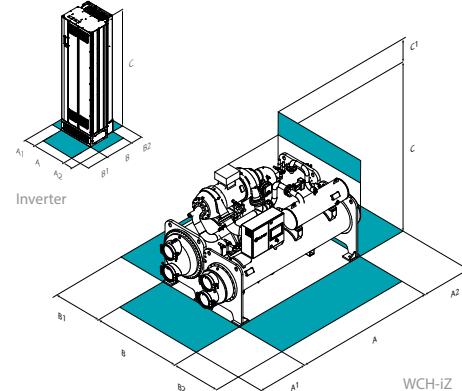

Capacity from 808 to 1599 kW

- ✓ Patented horizontal back to back centrifugal compressor with inverter regulation
- ✓ Solution for large commercial and industrial buildings, with quite zero environmental impact
- ✓ Refrigerant R1234ze - GWP = 7
- ✓ Very high full load and seasonal efficiency with SEER values up to 9.64
- ✓ Falling film evaporator, economizer, oil recovery system
- ✓ Low noise operation and almost total absence of vibrations
- ✓ Compact size: length measure less than 4 meters
- ✓ Condenser water temperature up to 40°C, evaporator water temperature down to 4°C

functions and features

dimensions and clearances

CAUTION!

For trouble-free operation of the unit it is essential to maintain the safety distances indicated by the green areas.

SCREWLINE³

Liquid chiller

Condenserless

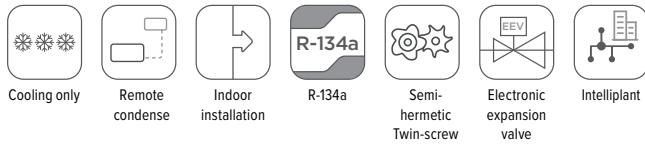

Indoor installation

Capacity from 300 to 1427 kW

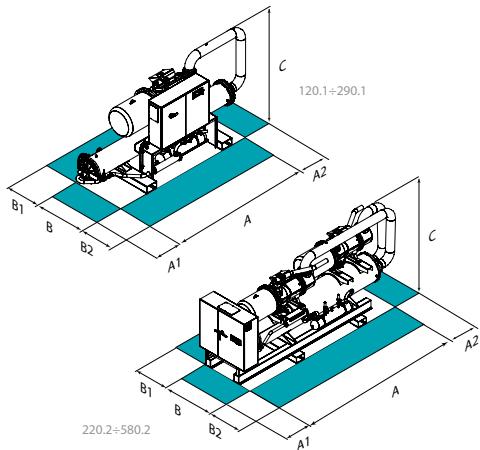

- ✓ Screw compressors and shell & tube evaporator
- ✓ Solution for cold climates in combination with remote condensers
- ✓ One or two independent circuits for high reliability
- ✓ Refrigerant R134a - GWP = 1430
- ✓ All sensitive components are protected against the atmospheric agents
- ✓ Two acoustic configurations: standard and super-silenced
- ✓ Modular operation management, up to 8 units in cascade
- ✓ Condensing temperature up to 65°C, low water temperature down to -8°C

The Product is compliant with the Erp (Energy Related Products) European Directive. It includes the Commission delegated Regulation (EU) No 2016/2281, also known as Ecodesign Lot21. Performance data are referred to operation with 30% of outdoor and exhaust air; (configuration CCK)
(1) Ambient air at 27°C/19°C WB. Entering external exchanger air temperature 35°C
(2) Ambient temperature 20°C DB. Outside temperature 7°C DB/6°C WB
(3) ROT = rotary compressor; SCROLL = scroll compressor
(4) RAD = Radial fan; AX = Axial Fan; EC = Electronically Commutated
(5) Net outside static pressure to win the outlet and intake onboard pressure drops
(6) Configuration for outdoor air supply with exhaust and extraction; (only with CCK configuration)

(7) Sound pressure levels are referred to units operating at nominal load in nominal conditions. Measurements are carried out according to EN 12101-1 at nominal standard conditions defined in respective regulations: EU 2016/2281, UE 813/2013, UE 811/2013.
(8) Data calculated according to the EN 14825:2022
(9) Capacity in total recirculation according to EN 14511:2022, indoor air temperature 27°C D.B./19°C CW.B.; outdoor temperature 35°C; EER according to EN 14511:2022
(10) Capacity in total recirculation according to EN 14511:2022, indoor air temperature 20°C; outdoor temperature 7°C D.B./6°C CW.B.; COP according to EN 14511:2022

accessories

FCE	Enthalpy FREE-COOLING	EH10	6 kW electric heaters

EH28	48 kW electric heaters	F9	High efficiency F9 air filter (ISO 16890 ePM1 80%)
GC10X	Condensing gas heating module with modulating control 82 kW (sizes 60.4÷80.4)	FIFD	Electronic filter with iFD technology (ISO 16890 ePM1 90%)
GC11X	Condensing gas heating module with modulating control 100 kW (sizes 60.4÷80.4)	PSAF	Differential pressure switch for dirty air filters
GC12X	Condensing gas heating module with modulating control 130 kW (sizes 90.4÷120.4)	HSE8	8 kg/h immersed electrodes steam humidifier
GC13X	Condensing gas heating module with modulating control 164 kW	HSE9	15 kg/h immersed electrodes steam humidifier
GC06X	Condensing gas heating module with modulating control 200 kW	PUE	External humidifier management with 0-10V signal
GC07X	Condensing gas heating module with modulating control 300 kW (sizes 90.4÷120.4)	LTEMP1	Application for low outdoor temperature
EWX	Enthalpy wheel energy recovery module (CBK-G version)	EXFLOWC	Application in spaces with forced air exhaust at variable flow and exhaust section (CCK-REVO version)
AMRX	Rubber antivibration mounts	UVCX	UV-C lamp module with germicidal effect
AMRMX	Rubber antivibration mounts for unit and gas module	BRCI	Sloping drain pan
AMRUVX	Rubber antivibration mounts for unit and UV-C Lamps module	LON	TP/FT serial port with LonWorks protocol
AMREWX	Rubber antivibration mounts for unit and enthalpy wheel module	BACIP	BACnet-IP serial communication module
RCX	Roof curb	BACMSTP	BACnet-MSTP serial communication module
PGFC	Finned coil protection grill	SFSTR	Disposal for inrush current reduction
PGCCH	Anti-hail protection grilles	NCRC	Remote control with user interface: not required
PCMO	Sandwich panels of the handling zone in M0 fire reaction class	CSOND	Temperature and humidity ambient control with built-in probes
CPHG	Hot gas re-heating coil	MDMTX	Management of ambient temperature probes
M3	Downward supply	MDMTUX	Management of ambient temperature and humidity probes
M5	Upward supply	MDMADX	Advanced monitoring and management ambient probes
R3	Downward air return	IOTX	IoT industrial module for cloud based interoperability & services
SER	Outdoor air damper manually set (CBK version)	SIX	Service interface (cable of 1,5 metres)
SERM	Outdoor air motorized on/off damper (CBK version)	PFCC	Power factor correction capacitors (cosfi > 0.95)
SFCM	Modulating motorised FREE-COOLING damper (Optional for CBK, Standard for CBK-G and CCK-REVO)	DESM	Smoke detector
NSERG	Gravity exhaust air damper: not required (CBK-G version)	CONT2	Energy meter
VENH	High static pressure fan	CHMET	Cooling and Heating Capacity Meter
		PTCO	Set up for shipping via container

Accessories whose code ends with "X" are supplied separately

For compatibility between the various accessories, please refer to the dedicated Technical Bulletin or our website in the Systems and Products section.

PACKAGED

CLIVETPACK³ⁱ**Packaged air-conditioning unit**

CSNX-iY: Reversible heat pump

Air cooled

Roof Top

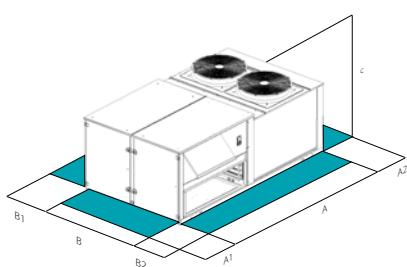

Capacity from 40 to 119 kW

Clivet participates in the ECP Programme for "Rooftops". Check ongoing validity of certificate on: www.eurovent-certification.com

compliant
ErP

- ✓ Specifically designed for crowded buildings
- ✓ Refrigerant R32
- ✓ Full inverter
- ✓ Evolution of Energy recovery concept
- ✓ Evolution of Energy recovery concept
- ✓ Extended working limit (-15°C in heating mode)
- ✓ Reliability and increased efficiency ensured by double refrigerant circuit
- ✓ Remote and centralized system monitoring through INTELLIAIR

CCK-REVO	Standard power supply	V	400/3~/50	400/3~/50	400/3~/50
Sound power level outside		(6) dB(A)	83	89	88
Directive ErP (Energy Related Products)					
SEER - AVERAGE Climate		(7)	4,67	4,94	4,57
η _{SC}		(7) %	183,8	194,6	179,8
SCOP - AVERAGE Climate		(7)	3,53	3,95	3,75
η _{SH}		(7) %	138,2	155,0	146,6

The Product is compliant with the Erp (Energy Related Products) European Directive. It includes the Commission delegated Regulation (EU) No 2016/2281, also known as Ecodesign Lot21.

Performances are referred to operation with 30% fresh and exhaust air with thermodynamic recovery REVO (CCK-REVO)

(1) Ambient air at 27°C/19°C W.B. Entering external exchanger air temperature 35°C D.B. / 24°C W.B.

(2) Ambient air at 20°C D.B. / 12°C W.B., Entering external exchanger air temperature 7°C D.B. / 6°C W.B.

(3) ROT = Rotary compressor; SCROLL = Scroll compressor

(4) RAD = Radial fan; AX = Axial Fan; EC = Electronically Commutated

(5) Net outside static pressure to win the outlet and intake onboard pressure drops

(6) Sound pressure levels are referred to units operating at nominal load in nominal conditions. Measurements are carried out according to UNI EN ISO 9614-1 at nominal standard conditions defined in respective regulations: EU 2016/2281, UE 813/2013, UE 811/2013

(7) Data calculated according to the EN 14825:2022

(8) Capacity in total recirculation according to EN 14511-2022, indoor air temperature 27°C D.B./19°C W.B., outdoor temperature 35°C; EER according to EN 14511-2022

(9) Capacity in total recirculation according to EN 14511-2022, indoor air temperature 20°C; outdoor temperature 7°C D.B./6°C W.B.; COP according to EN 14511-2022

accessories

FC	Thermal FREE-COOLING (Standard)
FCE	Enthalpy FREE-COOLING
REVO	REVO exhaust air thermodynamic energy recovery (standard)
CHW2	Two-rows hot water coil
3WVM	3-way modulating valve
2WVM	2-way modulating valve
EH10	6 kW electric heaters (size 20.2)
EH12	9 kW electric heaters (size 20.2)
EH15	13.5 kW electric heaters (size 20.2-28.2)

GC08X	Condensing gas heating module with modulating control 44 kW (size 20.2-28.2)
GC09X	Condensing gas heating module with modulating control 65 kW (size 28.2-40.4)
GC10X	Condensing gas heating module with modulating control 82 kW (size 28.2-40.4)
GC11X	Condensing gas heating module with modulating control 100 kW (size 40.4)
GC12X	Condensing gas heating module with modulating control 130 kW (size 40.4)
AMRX	Rubber antivibration mounts
AMRMRX	Rubber antivibration mounts for unit and gas module
AMRUVX	Rubber antivibration mounts for unit and UV-C Lamps module
RCX	Roof curb
PGFC	Finned coil protection grill
PGCCH	Anti-hail protection grilles
PCMO	Sandwich panels of the handling zone in M0 fire reaction class
CPHG	Hot gas re-heating coil
M3	Downward air supply
M5	Upflow air supply
ML	Sideward supply
R3	Downward air return
SERMD	Modulating motorized outdoor air damper (standard)
VENH	High static pressure fan
PVAR	Variable airflow
PCOSM	Constant supply airflow

PVARDP	Variable airflow with pressure probe on the unit
PVMV	4-20mA signal for supply and exhaust air flow rate modulation
PAQC	Air quality probe for CO ₂ rate check
PAQCV	Air quality sensor for CO ₂ and VOC rate check
PAQC2	Double air quality probe for CO ₂ rate check
PAQCV2	Double air quality probe for CO ₂ and VOC rate check
PPAQC	External CO ₂ signal management
F7	High efficiency F7 air filter (ISO 16890 ePM1 55%)
F9	High efficiency F9 air filter (ISO 16890 ePM1 80%)
FID	Electronic filter with iFD technology (ISO 16890 ePM1 90%)
PSAF	Differential pressure switch for dirty air filters
HSE3	3 kg/h immersed electrodes steam humidifier (size 20.2)
HSE5	5 kg/h electrode boiler steam humidifier (size 20.2-28.2)
HSE8	8 kg/h immersed electrodes steam humidifier
HSE9	15 kg/h immersed electrodes steam humidifier (size 28.2-40.4)
PUE	External humidifier management with 0-10V signal
LTEMP1	Application for low outdoor temperature
EXFLOWC	Application in spaces with forced air exhaust at variable flow and exhaust section
UVCX	UV-C lamp module with germicidal effect
CMSC13X	Serial communication module for Modbus TCP/IP, BACnet IP, BACnet MSTP superviso
CTT	Temperature control with thermostat
CSOND	Temperature and humidity ambient control with built-in probes
MDMTX	Management of ambient temperature probes
MDMTUX	Management of ambient temperature and humidity probes
MDMADX	Advanced monitoring and management ambient probes
IOTX	IoT industrial module for cloud based interoperability & services
DESM	Smoke detector
CONTA2	Energy meter
CHMET	Cooling and Heating Capacity Meter
DML	Demand Limit
PTCO	Set up for shipping via container

For compatibility between the various accessories, please refer to the dedicated Technical Bulletin or our website in the Systems and Products section.

CLIVETPACK² FFA

Packaged air-conditioning unit

CSRН-XHE2 FFA: Reversible heat pump

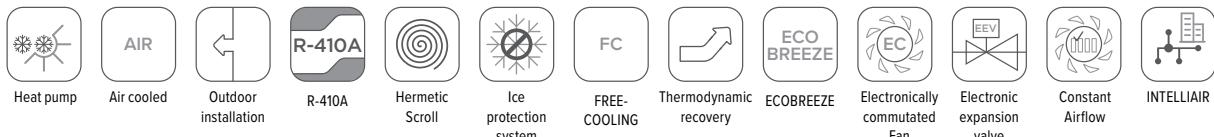

Air cooled

Roof Top

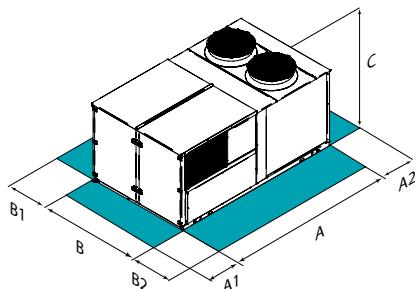

Capacity from 40 to 90 kW

- ✓ Specifically designed for 100% fresh air conditioning application
- ✓ No contamination between supply and exhaust air
- ✓ High part load efficiency
- ✓ Smart Freecooling and Defrosting management
- ✓ Enhanced air filtration with low ventilation consumption
- ✓ Thermodynamic recovery
- ✓ Compliant with main communication protocols (Modbus, Bacnet and Lonworks)
- ✓ Many available configurations suitable for the most different project situation
- ✓ Interaction with third part extraction systems
- ✓ All component included on board for an enhanced installation
- ✓ Remote and centralized system monitoring through INTELLIAIR

FRESH LARGE EVO

Make-up air unit, full fresh air

With return/exhaust and thermodynamic heat recovery

Reversible heat pump

Indoor installation

Air flow rate from 300 to 2500 m³/h

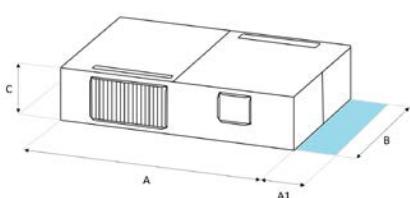

- ✓ Refrigerant R32
- ✓ Full inverter
- ✓ Extended working limit (up to -20°C in heating mode)
- ✓ Additional available capacity for indoor air conditioning
- ✓ Efficient exhaust air energy recovery and low ventilation consumption thanks to the active thermodynamic recovery
- ✓ Enhanced air filtration with low ventilation consumption
- ✓ No contamination between supply and exhaust air
- ✓ Smart Freecooling and Indoor Air Quality
- ✓ All primary air devices already on board, for a simplified system design
- ✓ Compatible with VRF and Clivet monitoring systems (Control4 NRG, Clivet Eye, INTELLIAIR)
- ✓ EPP structure for maximum acoustic comfort and thermal insulation

ErP (Energy Related Products) European Directive, that includes the Commission delegated Regulation (EU) No 2016/2281 also known as Ecodesign Lot21, does not report this Product category.

Cooling working conditions: indoor air temperature 27°C D.B./19°C W.B., outdoor air temperature 35°C D.B./24°C W.B.

Heating working conditions: indoor air temperature 20°C D.B./12°C W.B., outdoor air temperature 7°C D.B./6°C W.B.

(1) Supply air temperature in cooling 24°C, supply air temperature in heating 20°C

(2) Data according to EN 14511-2022 and external static pressure 50Pa

(3) Supply air humidity ratio 11g/kg in cooling and supply air temperature 30°C in heating

(4) ROT = rotary compressor

(5) CFG = Centrifugal fan; EC = Electronically commutated

(6) Sound power levels are referred to units operating at nominal load in nominal conditions. Measurements are carried out according to UNI EN ISO 9614-1 at nominal standard conditions.

accessories

FC	Thermal free-cooling (Standard)
PCOSME	Constant airflow in supply and exhaust (Standard)
PVARC	Variable air flow on supply and exhaust with CO ₂ probe
PVARCV	Variable air flow on supply and exhaust with CO ₂ +VOC probe
PPAQC	External CO ₂ signal management
F7B	High efficiency F7 air filter (ISO 16890 ePM1 60%)
FELIFD	Electronic filter with iFD technology (ISO 16890 ePM1 90%)

FG3CX Prefiltration for duct installation G3 (ISO 16890 Coarse 40%)

CRC Remote control with user interface (Standard)

IOTX IoT industrial module for cloud based interoperability & services

CUE1 External humidifier control with ON-OFF control

MEAX Absorbed energy meter

ASOFX Kit of antivibration mounts for ceiling installation

APAVX Kit of antivibration mounts for floor installation

Accessories whose code ends with "X" are supplied separately

For compatibility between the various accessories, please refer to the dedicated Technical Bulletin or our website in the Systems and Products section.

ZEPHIR³

Make-up air unit, full fresh air

With return/exhaust and thermodynamic heat recovery

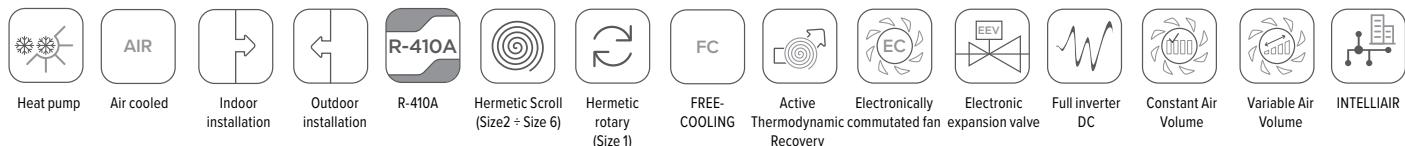

Reversible heat pump technology

Indoor or outdoor installation

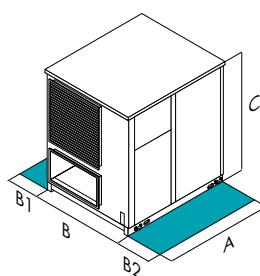

Air flow rate from 1000 to 14000 m³/h

- ✓ Inverter compressors
- ✓ Constant supply of temperature and humidity, both in cooling and heating mode both in cooling and heating mode.
- ✓ Additional available capacity for indoor air conditioning
- ✓ Efficient exhaust air energy recovery and low ventilation consumption thanks to the active thermodynamic recovery
- ✓ Enhanced air filtration (Electronic Filter iFD as std) with low ventilation consumption
- ✓ No contamination between supply and exhaust air
- ✓ Modulating re-heating, free heat from condenser
- ✓ Smart Freecooling and Indoor Air Quality management
- ✓ All primary air devices already on board, for a simplified system design
- ✓ Remote and centralized system monitoring through INTELLIAIR

ErP (Energy Related Products) European Directive, that includes the Commission delegated Regulation (EU) No 2016/2281 also known as Ecodesign Lot21, does not report this Product category.

DB = dry bulb; WB = wet bulb; EERc = Thermodynamic efficiency of the system in cooling; COPc = Thermodynamic efficiency of the system in heating

(1) Outdoor air temperature: 35°C D.B./ 24°C W.B; Exhaust air temperature: 26°C D.B. Supply air humidity ratio: 11g/kg. Supply air temperature: 24°C D.B.

(2) Outdoor air temperature: 7°C D.B./6.0°C W.B. Exhaust air temperature: 20°C D.B./ 12°C W.B; Supply air temperature: 20°C D.B.

(3) Outdoor air temperature: 35°C D.B./ 24°C W.B; Exhaust air temperature: 26°C D.B. Supply air humidity ratio: 11g/kg

(4) Outdoor air temperature: 7°C D.B./6.0°C W.B.; Exhaust air temperature: 20°C D.B./12°C W.B; Supply air temperature: 30°C D.B.

(5) Outdoor air temperature: 35°C D.B./ 24°C W.B; Exhaust air temperature: 26°C D.B. Supply air temperature: 22°C D.B.

(6) Outdoor air temperature: 7°C D.B./6.0°C W.B. Exhaust air temperature: 20°C D.B./ 12°C W.B; Supply air temperature: 16°C D.B.

(7) ROT = rotary compressor; SCROLL = scroll compressor

(8) RAD = radial fan; EC = Electronically Commutated

(9) Sound pressure levels are referred to units operating at nominal load in nominal conditions. Measurements are carried out accordingly to UNI EN ISO 9614-1 at nominal standard.

(10) In case of use with high air flow only the maximum flow rate value is possible

versions and configurations

ENERGY RECOVERY:

RTA Active thermodynamic recovery (Standard)

VERSION:

RECH Hydronic recovery device for extended operating range

EPWRC EXTRAPOWER-C (with additional chilled water heat exchanger)

EPWRH EXTRAPOWER-H (with additional hot water heat exchanger, without electronic filters)

OPERATION:

RCM Refrigeration circuit with capacity modulation (Standard)

RE-HEATING COIL:

CPHGM Hot gas re-heating coil with capacity modulation (Standard)

UNIT INSTALLATION:

IO Outdoor installation (Standard)

II Indoor installation

accessories

CCA Copper/aluminium exchanger on exhaust air with acrylic lining

CEA Copper/aluminium exchanger on outdoor air with acrylic lining

PVARC Variable air flow on supply and exhaust with CO₂ probe

PVARCV Variable air flow on supply and exhaust with CO₂+VOC probe

PVARP Variable air flow on supply and exhaust air with supply pressure probe

MHSEX immersed electrodes steam humidifying module

MOB Serial port RS485 with Modbus protocol

LON TP/FT serial port with LonWorks protocol

BACIP BACnet-IP serial communication module

VRFG VRF gateway

VSXSA Modification of the supply humidity ratio setpoint "X_SA" by an external signal: enable/disable via external contact or setpoint changing via Modbus and BACnet-IP protocol

DESM Smoke detector

AMRX Rubber antivibration mounts

AMRUX Rubber antivibration mounts for unit and humidification module

RSSX Remote supply air sensor

PTCO Set up for shipping via container

F7B High efficiency F7 air filter (ISO 16890 ePM1 60%)

Accessories whose code ends with "X" are supplied separately

The Product is compliant with the Erp (Energy Related Products) European Directive. It includes the Commission delegated Regulation (EU) No 2016/2281, also known as Ecodesign Lot21.

Values read in compliance with EN14511:2022 and including the required system fan motor and water pump capacity for overcoming pressure drops inside the unit.

(1) Ambient air 27°C D.B./19°C W.B. Exchanger water temperature 30°C / 35°C

(2) Ambient air 20°C D.B. Exchanger inlet water temperature 20°C. The water temperature at the exchanger output is read in relation to the flow of water being chilled.

(3) Ambient air 20°C D.B. Exchanger inlet water temperature 15°C. The water temperature at the exchanger output is read in relation to the flow of water being chilled.

(4) ROT = rotary compressor

(5) CFG = Centrifugal fan

(6) Water flow calculated in relation to the performances in cooling

(7) Sound levels refer to the unit at full load installed on the ceiling, ducted, with minimum, standard and maximum air flow rate of the fan. Available static pressure 40 Pa. In accordance with the UNI-EN ISO 3744 regulation, the average sound pressure level refers to a distance of 1 m from the outer surface of a ducted unit installed on the ceiling. Measurements are made in accordance to the UNI EN ISO 9614-2, with units installed over two sound reflective surfaces

(8) Data calculated according to the EN 14825:2022

accessories

CWMX	Electronic room control with display, for wall installation
CIWMX	Electronic room control with display, for wall installation
V2MODX	2-way modulating valve for disposable water system
V2ONX	2-way ON-OFF valve for variable flow-rate loop
TPF	Filter-holder frame with lateral and bottom exhaust
AMMX	Spring antivibration mounts
DAOJX	Air supply duct with flexible connection
DAIX	Return air duct
DAOIX	Air discharge and intake duct
FCVBX	Water balancing valve
VIFWX	Steel mesh strainer and hand shut-off valve

PFHCX	200 mm flexible pipes for the connection to the water circuit + drop conduit
PFHC1X	500 mm flexible pipes for the connection to the water circuit + drop conduit
CDPX	Condensate drain pump
MOBA	RS485 serial port with Modbus protocol, built-in
MOBX	Modbus RS485 serial port kit
CMSLWX	LonWorks serial communication module
BACX	BACnet serial communication module
VIMANX	Hand shut-off valve
BPH2OX	Shut-off valve for by-pass (water side)

Accessories whose code ends with "X" are supplied separately

The Product is compliant with the Erp (Energy Related Products) European Directive. It includes the Commission delegated Regulation (EU) No 2016/2281, also known as Ecodesign Lot21.

(1) Ambient air 26°C DB / 19°C WB; Exchanger inlet water 30°C; Exchanger water outlet 35°C
(2) Ambient temperature 20°C; Exchanger water outlet 10°C
(3) CFG = Centrifugal fan

(4) Max available static pressure with standard electrofan at min speed and nominal air flow;
According to the variability of the voltage also the value of capacity and head pressure

(5) Sound levels refer to units with full load under nominal test conditions. The sound pressure is measured at 1 m from the external surface of the unit in open field conditions

(6) Data calculated according to the EN 14825:2022

accessories

APFLX	Filter holder with access from the lower side
CDPX	Condensate drain pump
VIFWX	Steel mesh strainer and hand shut-off valve
FCVBX	Water balancing valve
V20NX	2-way ON-OFF valve for variable flow-rate loop
BPH20X	Shut-off valve for by-pass (water side)
V2MANX	Two-way manually actuated valves for constant water flow loop
V2MODX	2-way modulating valve for disposable water system

FLOX	Water control flow switch
MOBX	Modbus RS485 serial port kit
CSMSLWX	LonWorks serial communication module
BACX	BACnet serial communication module
CWMX	Electronic room control with display, for wall installation
CIWMX	Electronic room control with display, for wall installation
AMMX	Spring antivibration mounts
PCFMO	Panels with M0 reaction to fire class

Accessories whose code ends with "X" are supplied separately

CLIVETPACK²**Packaged air-conditioning unit**

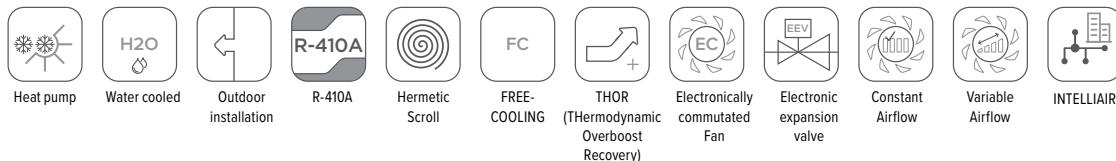

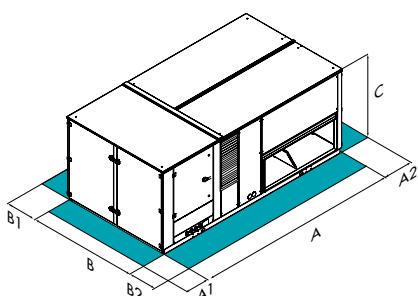

Reversible heat pump

Water cooled

Roof Top

Capacity from 51 to 412 kWErP
compliant

- ✓ High part load efficiency
- ✓ Smart Freecooling management
- ✓ Enhanced air filtration with low ventilation consumption
- ✓ Thermodynamic recovery
- ✓ Suitable for closed or open loop water systems
- ✓ Compliant with main communication protocols
- ✓ Many available configurations suitable for the most different project situation
- ✓ All component included on board for an enhanced installation
- ✓ Remote and centralized system monitoring through INTELLIAIR

functions and features**dimensions and clearances****CAUTION!**

For trouble-free operation of the unit it is essential to maintain the safety distances indicated by the green areas.

The Product is compliant with the Erp (Energy Related Products) European Directive. It includes the Commission delegated Regulation (EU) No 2016/2281, also known as Ecodesign Lot21.

Performance refers to operation at full recirculation (CAK config.)

(1) Data referred to the following conditions: Ambient air at 27°C/19°C W.B. Water to internal exchanger 30/35°C

(2) Data referred to the following conditions: Ambient temperature 20°C DB; Exchanger water outlet 10°C

(3) SCROLL = Scroll compressor

(4) RAD = ventilador radial; EC = Electronically Commutated

(5) Net outside static pressure to win the outlet and intake onboard pressure drops

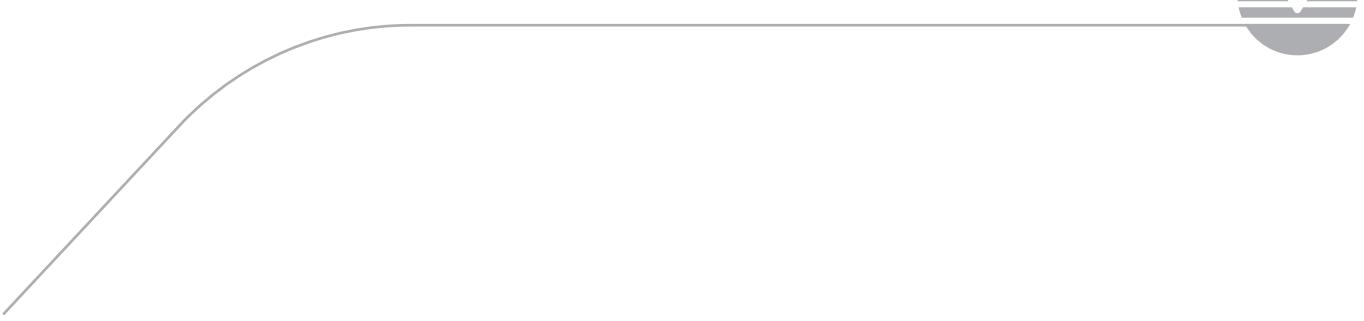

(6) Nominal water capacity determined in function of the cooling power

(7) Data calculated according to the EN 14825:2022

accessories

THR	Exhaust air THOR thermodynamic energy recovery (CCKP version)	IFWX	Steel mesh strainer on the water side
FC	FThermal FREE-COOLING	CHW2	Two-rows hot water coil
FCE	Enthalpy FREE-COOLING	CHWER	Energy recovery from food refrigeration
M3	Downward air supply	3WVM	3-way modulating valve
M5	Upflow air supply	2WVM	2-way modulating valve
R3	Downward air return	LTEMP1	Application for low outdoor temperature
SER	Outdoor air damper manually set	CPHG	Hot gas re-heating coil
SERM	Outdoor air motorized on/off damper	HSE3	3 kg/h immersed electrodes steam humidifier (size 14.2÷30.4)
SERMD	Modulating motorized outdoor air damper	HSE5	5 kg/h immersed electrodes steam humidifier (size 14.2÷30.4)
PVAR	Variable airflow	HSE8	3 kg/h electrode boiler steam humidifier (size 14.2÷110.4)
PCOSM	Constant supply airflow	HSE9	15 kg/h immersed electrodes steam humidifier (size 14.2÷110.4)
PAQC	Air quality probe for CO ₂ rate check	HWS	Water to waste evaporating wet-deck humidifier
PAQCV	Air quality sensor for CO ₂ and VOC rate check	MHP	High and low pressure gauges
VENH	High static pressure fans	CMSC9	Serial communication module for Modbus supervisor
F7	High efficiency F7 air filter (ISO 16890 ePM1 55%)	CMSC10	Serial communication module for LonWorks supervisor
FIFD	Electronic filter with iFD technology (ISO 16890 ePM1 90%)	CMSC11	Serial communication module for BACnet-IP supervisor
PSAF	Differential pressure switch for dirty air filters	CTERM	Remote keypad for indoor temperature and humidity control
EH12	9 kW electric heaters (size 14.2÷16.4)	CSOND	Temperature and humidity ambient control with built-in probes
EH14	12 kW electric heaters (size 14.2÷30.4)	PM	Phase monitor
EH17	18 kW electric heaters (size 14.2÷44.4)	PFCC	Power factor correction capacitors (cosfi > 0.95)
EH20	24 kW electric heaters (size 20.4÷110.4)	DML	Demand Limit
EH24	36 kW electric heaters (size 33.4÷110.4)	DESM	Smoke detector
EH28	48 kW electric heaters (size 49.4÷110.4)	SFSTC	Progressive compressor start-up device
ACPC	Hydraulic pipework arrangement for loop with constant flow-rate	PCMO	Sandwich panels of the handling zone in M0 fire reaction class
ACPV	Hydraulic pipework arrangement for loop with variable flow-rate	AMRX	Rubber antivibration mounts
ACPM	Hydraulic pipework arrangement for system with disposable water	RCX	Roof curb
ACIS	Antifreeze heater protection on the water side exchanger	PTCO	Set up for shipping via container

AURA

Water terminal unit

By water

Reversible hydraulic connections on site

Capacity from 1,6 to 8,2 kW

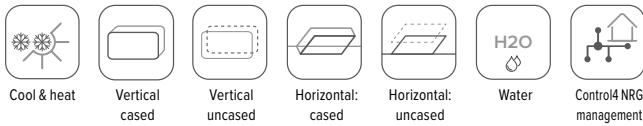

- ✓ Compact and quiet, with an elegant design suitable for any room
- ✓ Cased and uncased installation, vertical and horizontal, bottom and front return
- ✓ Versions for 2-pipe and 4-pipe systems
- ✓ Can be easily managed by external control systems
- ✓ Reversible hydraulic connections on site

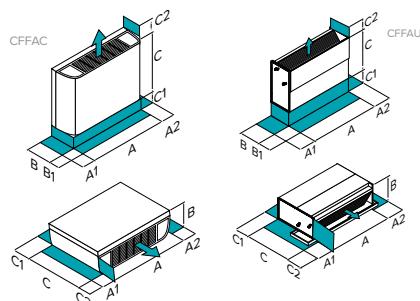

Clivet participates in the ECP Programme for "Fan Coil". Check ongoing validity of certificate on www.eurovent-certification.com

versions and configurations

VERSION:

CFFAC Cased version for vertical and horizontal installation
CFFAU Uncased version for vertical and horizontal installation

TYPE OF SYSTEM:

CC2 2-pipe (Standard)
CC4 4-pipe

RETURN:

R3 Return from the bottom (vertical installation / from the back (horizontal installation) (Standard)
RF Air return from the front (vertical installation) / from the bottom (horizontal installation)

HYDRAULIC CONNECTIONS

SX Pipes connection on the left (Standard)
DX Right side fittings

BUILT-IN VALVES

- not required (Standard)
3V2 3-way ON/OFF valves for 2-pipe version
3V4 3-way ON/OFF valves for 4-pipe version

BUILT-IN THERMOSTAT:

NOHMI not required (Standard)
HMIAM KJRP-86R control mounted on board

CCM30BX Touch-key indoor units' centralized controller

CCM09 Plastic frame for air supply and return (Standard)

CCM-180A/WS Wired centraliser with 6.2" touchscreen display and weekly scheduler (compatible with 021.0 to 041.0)

CCM-270A/WS Wired centraliser with 10.1" touchscreen display and weekly scheduler (compatible with 021.0 to 041.0)

3V2X Three-way valve kit for 2-pipe type "on/off" system

3V4X Three-way valve kit for 4-pipe type "on/off" system

DTX Auxiliary condensate collection tray

Accessories whose code ends with "X" are supplied separately

For compatibility between the various accessories, please refer to the dedicated Technical Bulletin or our website in the Systems and Products section.

MOOD

Water terminal unit

By water

Indoor installation, wall-mounted, cased

Capacity from 2,7 to 4,87 kW

- ✓ Compact and quiet, for residential and commercial applications
- ✓ DC technology for energy savings up to 70%
- ✓ Remote control, three-way valve and Modbus port supplied as standard

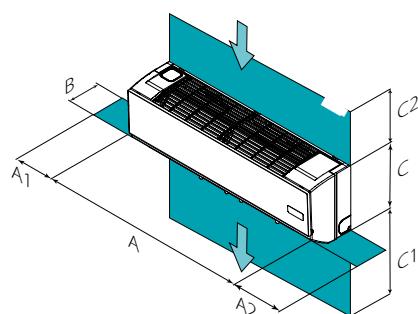

Clivet participates in the ECP Programme for "Fan Coil". Check ongoing validity of certificate on www.eurovent-certification.com

SAHU

Air conditioning unit

By water

Uncased horizontal and vertical indoor installation

Ductable

Air flow rate from 1500 to 15000 m³/h

compliant
ErP

- ✓ available in version for 2 and 4-pipe systems with or without on-board control;
- ✓ available in direct expansion version for connection to Clivet VRF and mini VRF systems;
- ✓ standard with self-bearing sandwich paneling thickness 40mm;
- ✓ centrifugal fans with belt / pulley transmission and IE2 type with inverter, IE3 engines settable at high pressure for air distribution through ducting;
- ✓ settable with EC plug fans (IE4) with high pressure (standard with on-board control);
- ✓ 4 or 6 row water coil or 4-row direct expansion coil;
- ✓ wide choice of accessories (mixing chamber, filters, bases, antivibration mounts, etc);
- ✓ electric heater section with different power
- ✓ remote and centralized system monitoring through INTELLIAIR

Air conditioning unit

For the air treatment

With modular sections

Indoor and outdoor installation

Air flow rate from 1260 to 160000 m³/h

Clivet participates in the ECP Programme for "Air Handling Units". Check ongoing validity of certificate on www.eurovent-certification.com

compliant
ErP

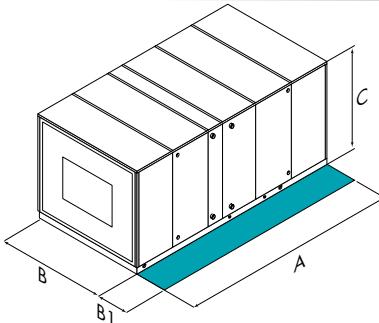

- ✓ two types of structure and panelling, 50 mm and 60 mm, which allow thermal break classes T2/TB3 and T2/TB2 to be achieved;
- ✓ 32 standard sizes with continuous air flow coverage at frontal speed of 2.2 to 2.5m/s;
- ✓ customisation of the dimensions in height and width with a 50 mm pitch to meet the most stringent architectural constraints.
- ✓ sandwich-type double-sheet panels with injected polyurethane or mineral wool thermal and acoustic insulation in between, thermal cut between the sheets, 50 or 60 mm thick, seven different types of sheet available;
- ✓ modular structure with smooth internal surfaces to minimise dust accumulation and facilitate cleaning and disinfection;
- ✓ for indoor or outdoor installation with protective roof;
- ✓ wide range of air filtration solutions from coarse filters, medium filters with rigid or floppy pockets, absolute, electronic, activated carbon, high and very high efficiency filters;
- ✓ germicidal and virucidal solutions with UV-C lamps or photocatalytic oxidation modules;
- ✓ static, rotary, run-around heat recovery units;
- ✓ water, direct expansion, steam, thermal oil, electric heat exchangers;
- ✓ adiabatic humidification systems, self-generated or network steam, water spray, washers;
- ✓ internal condensate collection tanks with anti-condensate insulation, with inclination towards the discharge, made of aluminium or stainless steel;
- ✓ centrifugal fan sections with belt and pulley drive, plug-fan radial with brushless EC motors, electric fans;
- ✓ without control systems or complete with probes, actuators, wiring, electrical panel with control system and unit management logic
- ✓ remote and centralized system monitoring through INTELLIAIR

selection software

The air handling units selection software allows to size the units and to have immediately the complete technical offer with executive drawings, technical data sheets and list of main components and materials used.

Hygienic air handling units

The AQX H version is available for applications that require high hygienic standards (pharmaceutical, hospital, food and microelectronic sectors). It guarantees maximum cleanliness and ease of maintenance in compliance with DIN 1946-4 and VDI 6022-1 standards. For more details, refer to the dedicated brochure by scanning the following QR code.

technical data

(l) Air passage speed on the heat exchange coils 2.5 m/s

accessories

The air treatment units of the AQX series are available with a vast range of accessories that can be selected directly with the selection software.

A few of the most common accessories are listed below:

- ✓ Weatherproof roof and control protection technical compartment;
- ✓ Weatherproof covers on the external air inlets and outlets
- ✓ Safety device for moving components
- ✓ Spotlights and viewing panel for inspection
- ✓ Inverters on the fan motors

Other accessories not found in the basic selection can be assessed on request.

Air conditioning unit

For the air treatment

With modular sections

Indoor and outdoor installation

Air flow rate from 1260 to 160000 m³/h

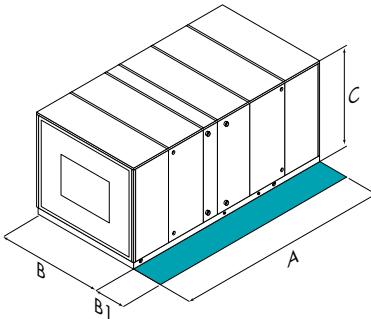

- ✓ two types of structure and panelling, 50 mm and 60 mm, which allow thermal break classes T2/TB3 and T2/TB2 to be achieved;
- ✓ 32 standard sizes with continuous air flow coverage at frontal speed of 2.2 to 2.5m/s;
- ✓ customisation of the dimensions in height and width with a 50 mm pitch to meet the most stringent architectural constraints.
- ✓ sandwich-type double-sheet panels with injected polyurethane or mineral wool thermal and acoustic insulation in between, thermal cut between the sheets, 50 or 60 mm thick, seven different types of sheet available;
- ✓ modular structure with smooth internal surfaces to minimise dust accumulation and facilitate cleaning and disinfection;
- ✓ for indoor or outdoor installation with protective roof;
- ✓ wide range of air filtration solutions from coarse filters, medium filters with rigid or floppy pockets, absolute, electronic, activated carbon, high and very high efficiency filters;
- ✓ germicidal and virucidal solutions with UV-C lamps or photocatalytic oxidation modules;
- ✓ static, rotary, run-around heat recovery units;
- ✓ water, direct expansion, steam, thermal oil, electric heat exchangers;
- ✓ adiabatic humidification systems, self-generated or network steam, water spray, washers;
- ✓ internal condensate collection tanks with anti-condensate insulation, with inclination towards the discharge, made of aluminium or stainless steel;
- ✓ centrifugal fan sections with belt and pulley drive, plug-fan radial with brushless EC motors, electric fans;
- ✓ without control systems or complete with probes, actuators, wiring, electrical panel with control system and unit management logic
- ✓ remote and centralized system monitoring through INTELLIAIR

functions and features

Heating-Cooling Indoor inst. Outdoor inst. Free-cooling INTELLIAIR

dimensions and clearances

CAUTION!

For trouble-free operation of the unit it is essential to maintain the safety distances indicated by the green areas.

(*) Length A depends on the specific configuration.

(**) Operating weight depends on the specific configuration.

(***) Height without base. Standard base = 120 mm

Dimensions refer to model with 50 mm structure, add 20 mm to the indicated dimensions to obtain the 60 mm structure.

The above data refer to standard units.

CONTROL4 NRG

CONTROL4 NRG

Energy assistant for the air conditioning system for Smart Office and commercial & industrial applications

- ✓ It manages up to 24 elements simultaneously
- ✓ Management of scenarios with different operating conditions and related programming bands
- ✓ Class A control according to European standard EN15232
- ✓ Scalable system for potential system expansions and integration of additional appliance control and self-consumption
- ✓ Energy management with power consumption and self-consumption data display
- ✓ Option for remote monitoring and control of systems from a PC or APP
- ✓ Compatible for interfacing with INTELLIPLANT systems

The whole system at your fingertips

Control4 NRG is a centralised supervision and management system for hydronic systems used for cooling, heating, domestic hot water production and air quality control in residential buildings and small businesses.

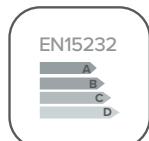

It enables the centralised management of systems made with compatible Clivet units, intelligently controlling all the system elements in order to obtain optimal comfort with maximum efficiency.

In synergy with renewable energy sources

Control4 NRG guarantees top system performance thanks to the Class A energy classification according to the strictest requirements for energy classification of buildings in compliance with the European standard UNI EN15232 (Energy performance of buildings - Impact of building automation, controls and technical building management).

Check self-consumption levels and decide when to switch on or off the air conditioning system according to the availability of energy from the photovoltaic system.

In synergy with renewable energy sources

Control4 NRG is designed to integrate with the most advanced renewable energy technologies for a cleaner, more sustainable future.

It captures the energy produced by your photovoltaic system as well as that of your air conditioning system, and displays the energy profiles in a simple and intuitive way.

Comfort and air quality

Control4 NRG manages room comfort both in traditional systems with seasonal reversibility (2-pipe configurations) and in new generation energy saving systems with heat recovery, which provide simultaneous and independent energy production in heating and cooling mode (4-pipe configuration).

Control4 NRG manages room comfort also thanks to the management of air renewal systems, ensuring that healthy environments are kept in line with the most stringent regulatory requirements on the well-being and health of people.

Control4 NRG and Clivet's Zephir renewal units also make it possible to replace the hydronic system mid-season to fulfil the heating requirements, thus ensuring more energy saving.

Ideal for all sectors

The system offers the utmost flexibility of use due to a number of climate zones available in both heating and cooling modes, its integration with substitute energy sources, energy consumption management and remote management from a PC or dedicated APP.

Offices

Shops

Restaurants

Remote control and access

The Clivet Eye APP allows remote access to the Control4 NRG system, enables monitoring of operating temperatures and access to the main system functions. Also available via WEB-APP from a PC or tablet. An internet connection is required.

Clivet Eye is ideal for all users who want to safely and efficiently manage the comfort of their office or business for the well-being of the people who work there.

HID-TSmart

HID-TSmart evolves the thermostat concept with a new generation device from which you can access all the information you need for efficient room management.

HID-TSmart is not only a smart thermostat, it is also an extension of CONTROL4 NRG that can provide information on the main system operating parameters simply and immediately: it allows you to acquire information on the temperature, relative humidity, energy consumption, energy produced by the photovoltaic system and charging level of the Clivet SINERGY electric water tank. It is enhanced with area control that allows you to set the system mode and ventilation level.

INTELLIPLANT

INTELLIPLANT

Optimisation system for centralised hydronic systems

INTELLIPLANT is the innovative technological solution designed to optimise the central heating/cooling plant of medium and large capacity systems, ensuring efficiency and reliability in any application, from comfort applications to more complex applications for industrial processes that require continuity of operation under any operating condition.

INTELLIPLANT optimises centralised systems by using the control algorithms of the devices which are involved in the production and distribution of thermal energy, as well as an advanced diagnostics survey engine which makes it possible to determine their state of maintenance.

Control and optimisation

INTELLIPLANT identifies the best activation sequence for units by starting them according to their performance curves, fulfilling the energy requirements of the system with minimum power consumption. INTELLIPLANT also optimises pumping units to ensure the distribution of fluids through the primary and secondary circuits by managing the variable flow-rates while reducing energy consumption.

The benefits from these control strategies are:

- ✓ high system efficiency levels
- ✓ reduction of waste from the over-production of energy
- ✓ better stabilisation of the system with reduced thermal and mechanical stress on the units.

Preventive diagnostics

INTELLIPLANT evolves the concept of maintenance, from conventional scheduled maintenance to "Condition Based Maintenance", i.e. maintenance tailored to each specific system based on its operating status.

The benefits from this model are:

- ✓ reduction of the amount of interventions and field trips
- ✓ better management of maintenance personnel
- ✓ lower maintenance costs
- ✓ reduction of system downtime due to sudden failures
- ✓ increased system productivity
- ✓ longer service life of thermal energy generation and distribution devices.

Energy under control

INTELLIPLANT has dedicated pages and reports to allow the plant's energy consumption to be monitored and controlled, with functions to:

- ✓ analyse and normalise the energy consumption of the devices in the plant
- ✓ identify critical issues and eliminate waste
- ✓ increase the level of comfort
- ✓ increase the continuity of system operation
- ✓ promote activities to increase the overall efficiency of the systems.

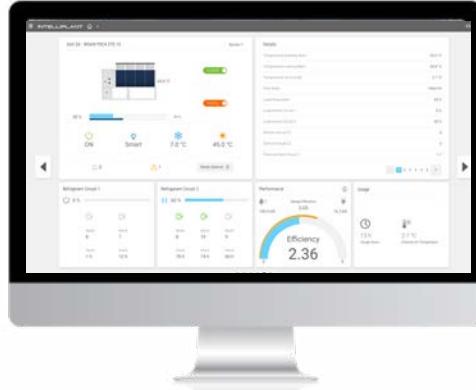

Functions and features

Clivet's Cloud-based service offers the option of remotely connecting to the INTELLIPLANT system and accessing its functions from any PC, smartphone and tablet with a web browser, without needing to install a dedicated APP.

System dashboard

Unit dashboard

INTELLIPLANT provides the user with a wide range of graphical pages that combine the most significant plant and unit operating parameters to ensure total control of mechanical systems both locally and remotely.

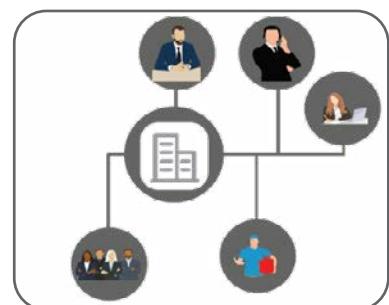

All of the pages can be viewed on a PC or smart device.

The main pages include:

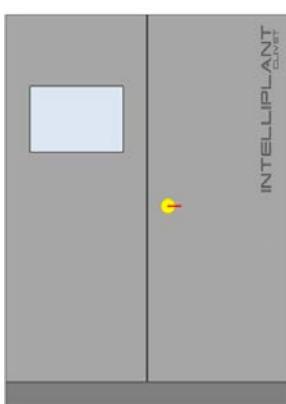

- ✓ System dashboard, with the most significant general system operating data
- ✓ Unit dashboard, with all the operating variables of the individual units
- ✓ Energy dashboard, with system and individual unit efficiency indices
- ✓ Maintenance dashboard, with operating values of system components and their operating status
- ✓ Commissioning page, to facilitate system start-up and calibration operations.

INTELLIPLANT is a solution for all professionals involved in the design, management and operation of technological systems:

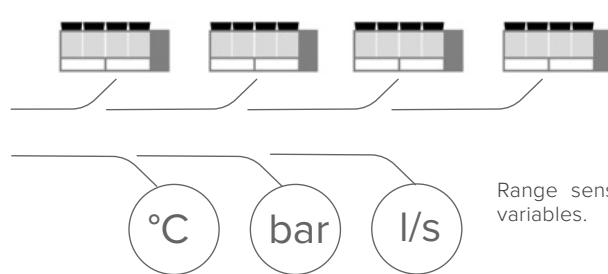

- ✓ HVAC system consultants and designers
- ✓ Building and Facility Managers
- ✓ Energy Managers
- ✓ ESCO
- ✓ Service Managers and maintenance technicians
- ✓ Builders and installers
- ✓ System investors and owners

INTELLIPLANT is a flexible, modular and expandable solution to better meet the most stringent structural, application and installation requirements in full compliance with safety standards and regulations.

INTELLIPLANT acquires in-situ all the information needed to keep the entire system running efficiently, such as temperatures, water flow-rates and operating pressures, right down to the most direct operating parameters of each individual heating/cooling unit.

Heating/cooling units, circulation pumps and source devices.

Range sensors for acquiring operating variables.

INTELLIPLANT CORE

INTELLIPLANT CORE

Optimisation system for centralised hydronic systems

- ✓ Monitoring and control of hydronic chiller units, reversible heat pumps and multifunctional units
- ✓ Workload distribution: The heating and cooling load is equally distributed between the various units, making the most of their operation in partial load mode.
- ✓ Centralised management: Professional multi-site cloud platform for unified and simplified control. This allows the various systems to be monitored and managed from a single interface

System manager

The INTELLIPLANT system allows you to efficiently and continuously manage the hydronic units on the local operator panel and on the remote interface on a computer, smartphone or tablet. INTELLIPLANT CORE consists of a main control panel that manages the connection to the various hydronic units (chillers, reversible heat pumps and multifunctional units) equipped with both serial and Ethernet communication. Thanks to the values acquired in real time from the system, advanced control logics enable efficient management of thermal loads based on real system demand, constantly monitoring the system conditions and selecting unit activation, either based on the most performing activation sequence or by balancing the operating hours.

- ✓ Monitoring and control of hydronic chiller units, reversible heat pumps and multifunctional units
- ✓ Primary circuit management of 2-pipe and 4-pipe systems with Clivet air source units with integrated hydronic unit
- ✓ Integration with BMS/BAS through open protocols
- ✓ Management of operating parameters such as temperature and seasonal mode change
- ✓ Scheduled and manual system switch-on

Management

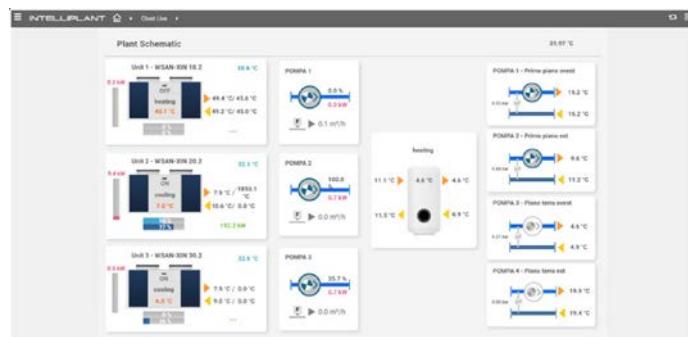

Safety and professionalism

The INTELLIPLANT CORE system ensures centralised multi-site monitoring via a cloud platform that adheres to data protection privacy levels in accordance with the most stringent interpretations of the GDPR (Global Data Protection Regulation).

Aimed at operators such as facility managers, system operators and plant managers.

Graphic interface

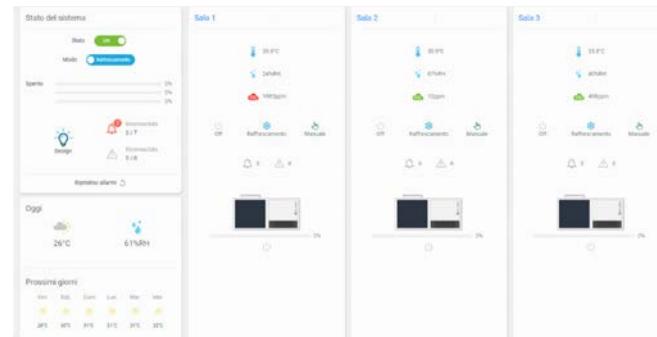

Plant schematic

The page offers a customised graphic representation where each area can be checked:

- ✓ operation status;
- ✓ real-time values of key operating parameters such as temperature and humidity;
- ✓ presence of alarms that must be promptly reported to the system supervisor/manager

Plant dashboard

The main page of the system provides an overview with reports for all areas:

- ✓ system operational status and quick action buttons;
- ✓ percentage and mode of operation of individual units, broken down by areas;
- ✓ maintenance status resulting from the preventive analysis of each individual unit;
- ✓ priority and second-level alarms;
- ✓ current day's weather and forecast for the next 7 days;

In detail, the user can access all parameters specific to the area or individual units and their operating parameters.

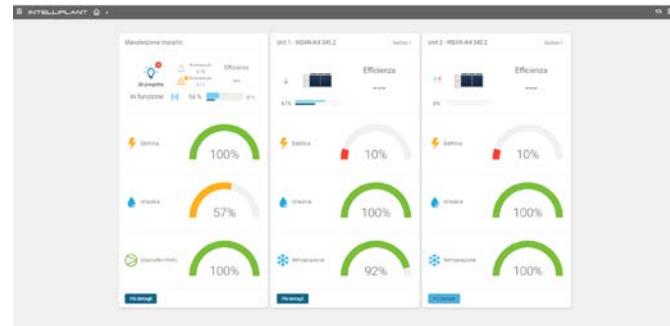

Unit

The following basic information is displayed for each unit:

- ✓ graphical model of the unit with dynamic representation of the operating state;
- ✓ operating status of the unit and buttons for quick actions;
- ✓ details of component status (fans, compressors, etc.);
- ✓ list of parameters and their values in real time.

Predictive maintenance

INTELLIPLANT helps to develop the concept of maintenance from traditional "scheduled routine maintenance" to the more advanced idea of "condition based maintenance", i.e. maintenance customised per event according to its operational status, applicable to the most significant situations affecting refrigeration thermal unit components.

- ✓ Local and remote visibility via dedicated Cloud platform
- ✓ Ventilation optimisation with air quality acquisition
- ✓ Advanced scheduler for the activation of energy profiles
- ✓ Diagnostic survey system for preventive maintenance management
- ✓ Integration with BMS/BAS for alarm notification and supervision

Focus on comfort

INTELLIAIR is Clivet's specialised solution for the supervision and control of air conditioning systems in all applications where comfort and energy efficiency are paramount. Thanks to the integration with autonomous rooftop air conditioning units, a high level of consumption optimisation in air handling can be achieved while ensuring the utmost comfort in the rooms.

The INTELLIAIR supervision solution is perfect for:

- ✓ shopping centres
- ✓ multiplex cinemas, theatres, auditoriums
- ✓ commercial premises and areas
- ✓ Ho.Re.Ca sector

The high energy savings with INTELLIAIR are ensured by the automated management of independent areas, through the programming of targeted energy profiles to eliminate inefficiencies that can occur in centralised systems, without sacrificing comfort.

Highly adaptable

INTELLIAIR consists of a pre-wired and pre-assembled hardware and software system inside a control box suitable for installation in a control room or dedicated technical room. A 10" touchscreen panel on the control box allows the operator to consult all pages containing information on the system to be monitored.

Everything under control

Communication between INTELLIAIR, Clivet air conditioning units and field devices is via RS-485 serial line with RTU Modbus communication protocol, which simplifies wiring and ensures long operating distances. Furthermore, communication can be provided based on Ethernet protocol to extend the application range to Clivet units with TCP/IP Modbus communication protocol.

In addition to temperature and humidity control, comfort is even more advanced due to the full integration of high-tech sensors that monitor the air quality index for every single area.

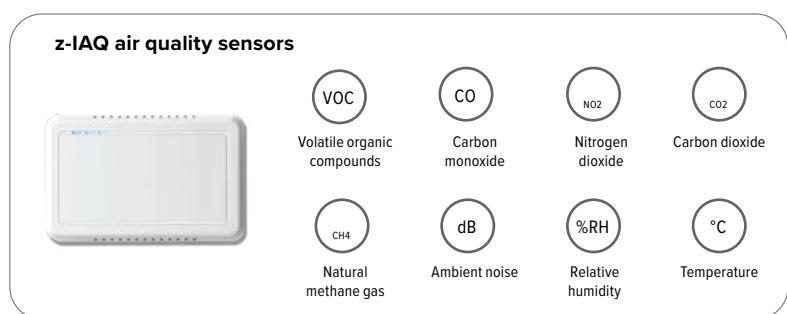

TEMPERATURE

HUMIDITY

AIR QUALITY

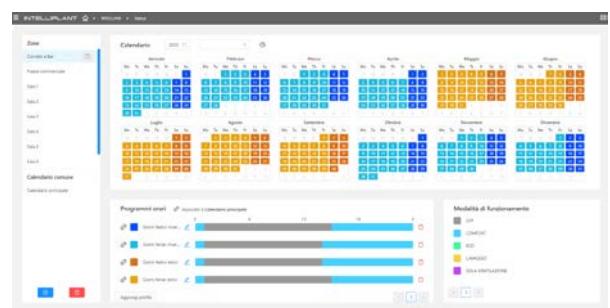

INTELLIAIR is designed to provide full compatibility with all BMS/BAS, thereby ensuring total transparency when viewing the system even by these systems.

INTELLIAIR provides an intuitive dashboard that easily displays all the information on the system's operating mode on cards that automatically adjust to the size of the screen on the local operator panel and on the remote interface.

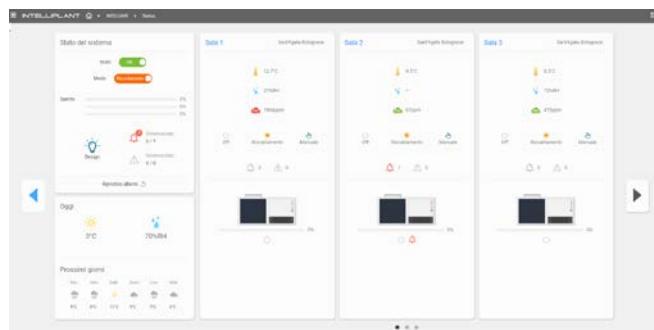

Comfort planning

Programming is one of the most important features of INTELLIAIR for automatic system operation. With the scheduler, you can program the right comfort in the different zones of the building throughout the year so as to maintain their comfort independently of the others, thus eliminating the waste and inefficiency that can occur in centralised systems. The main features are:

- ✓ Daily/annual programming of temperature, humidity, CO₂ setpoints
- ✓ Sharing set-points with all the units belonging to that zone
- ✓ Maintenance planning

From an overall view to the individual detail

The main system page provides direct access to the various zones and displays the following main information:

- ✓ operating status of the system and buttons for quick actions
- ✓ percentage and operating mode of single units, by area
- ✓ maintenance status following the preventive analysis of each individual unit
- ✓ priority and second-level alarms
- ✓ current day's weather and forecast for the next 7 days

In detail, the user can access all parameters specific to the area or individual units and their operating parameters.

Percentage and operating mode of single units, by area:

- ✓ 7-day scheduling of units connected to the area
- ✓ display and modification of the room temperature setpoint, relative humidity and air quality
- ✓ alarm status and specific warnings for the area
- ✓ room temperature, relative humidity and air quality trends over the last 12 hours

The following basic information is displayed for each unit:

- ✓ operating mode (heating / cooling / Auto) and performance of the unit
- ✓ operating status (comfort / Eco / off)
- ✓ current temperature, relative humidity and air quality values
- ✓ detailed component status (fans, compressors, etc.)

Clivet Eye

Clivet Eye

**Monitoring and diagnostic survey system
for remote management of Clivet units
and systems**

Clivet Eye is the monitoring system to remotely control air conditioning, heating, air renewal and hot water production units and systems for both private and professional use.

It is intended for end users and professionals for the control and preventive maintenance of heating and cooling units.

All systems at a glance

With Clivet Eye you can monitor and manage all Clivet systems located in the country, even if they are of different types.

The geographical map of Clivet Eye enables all of the systems to be quickly and constantly monitored in real-time, showing their operating conditions simply and intuitively.

Event notifications promptly warn of any system malfunctions.

Clivet Eye provides a graphic page with the location of the units and identifies their operating status with a "traffic light" system.

This makes it possible to detect the operating status of the units in advance and react promptly to avoid system breakages and shut-downs.

Unit running
No action required on site

Unit offline
Requires verification of
network connection

Non-blocking fault
Requires verification of unit
operating parameters to
preserve system integrity and
operation continuity

Blocking alarm
Requires verification of unit
status to restore correct
operation

Main features

- ✓ Easy control of units / systems via the App and Web Dashboard
- ✓ Prompt signalling of malfunctions through e-mail event notifications
- ✓ Programming of operating conditions through time schedules (switch-on, switch-off, changing operating set points)
- ✓ In-depth remote analyses and reset of small alarms reducing the need for on-site intervention
- ✓ Faster and more effective interventions due to prompt signalling of malfunctions via e-mail
- ✓ Analysis of the history of operating conditions
- ✓ Verification of electric and power consumption of individual units (check compatibility with individual unit model)
- ✓ Calculation of efficiencies of individual units (check compatibility with individual unit model)
- ✓ Air quality analysis (available for roof top units fitted with air quality sensors)

Advanced functions

Performance monitoring

Clivet Eye acquires the electric energy and consumption values of individual units and makes them available in graphic format on simple and intuitive interfaces.

In the desktop version, Civet Eye also calculates the efficiency of the unit accurately, thereby allowing professionals to carry out diagnostic surveys based on actual performance conditions measured in real time.

Air quality index

Clivet Eye acquires the air quality values of air-conditioned rooms by means of Clivet roof top units.

The graphic interface displays the following values:

- ✓ temperature and humidity
- ✓ VOC index
- ✓ carbon dioxide (CO₂)
- ✓ carbon monoxide (CO)
- ✓ methane (CH₄)
- ✓ nitrogen dioxide (NO₂)
- ✓ ambient noise level (dB)

All values measured are available in real time and in chart format with the trend of changes over time.

Connectable Units

Hydronic units for chilled and hot water production, 4-pipe multifunctional units, dedicated heat pumps for high temperature hot water production

Roof top for the air conditioning of medium- and high-crowded buildings.
Independent primary air unit

Air handling unit

Who needs Clivet Eye?

Clivet Eye is intended for end users, facility managers, service centres and system managers in general who need to monitor the system remotely.

END USERS

SYSTEM MANAGERS

MAINTENANCE PERSONNEL
